Cianjur, West Java

SUMMARY

Pharmacy student at Padjadjaran University specializing in pharmaceutical formulation research and product development. Possesses a strong understanding of industry operational standards, supported by research data analysis skills, effective communication, and solid teamwork abilities. Has a strong desire to apply, test, and explore pharmaceutical industry practices in real-world settings and to provide tangible added value during the professional program to drive operational efficiency and product innovation within the company.

EDUCATION

Universitas Padjadjaran <i>Apothecary Profession</i> GPA: 3.82/4.00	2025 - Present
Universitas Islam Bandung <i>Bachelor in Pharmacy</i> GPA: 3.82/4.00	2021 - 2025

WORK EXPERIENCE

PT. Pyridam Farma Tbk. <i>Pharmacist Professional Practice – Production Department</i>	March 2026 – April 2026
- Analyzed Man-Hour (MH) trends to evaluate production efficiency, successfully identifying process bottlenecks and optimizing manufacturing workflows. - Revised and updated 20 Standard Operating Procedures (SOP) to ensure 100% compliance with current CPOB/GMP regulations and industry best practices. - Spearheaded cross-functional collaboration with Production, QA, QC, PPIC, and Engineering teams to streamline pharmaceutical manufacturing systems and quality management processes. - Evaluated and enforced containment principles and CPOB contamination control guidelines within the specialized beta lactam production facility to mitigate cross-contamination risks. - Executed and delivered all assigned pharmacy practice projects with high accuracy and strictly within designated deadlines.	
PT. Bina San Prima <i>Pharmacist Professional Practice – Pharmaceutical Distribution Center (PBF)</i>	February 2026
- Ensuring 100% compliance with documentation requirements for the distribution of controlled drugs (psychotropic substances, precursors, and OOT) in accordance with applicable regulations. - Auditing and evaluating the cold chain (Cold Chain Management) to ensure the stability and quality of CCP products from receipt through delivery. - Managing the PBF quality assurance system by implementing the core principles of CDOB throughout the entire distribution process.	
APOTEK Al-Ma’soem Cibiru <i>Pharmacist Professional Practice</i>	January 2026
- Manage the operational workflow of community pharmacies from procurement planning and inventory management to periodic reporting to ensure medication availability and efficient inventory management. - Clinical pharmacy services and counseling on self-medication for over the counter (OTC) and limited over the-counter medications to ensure appropriate medication selection and patient safety. - Pharmaceutical education and counseling for chronic patients enrolled in the BPJS Referral Re-admission Program (PRB) to improve treatment adherence and minimize the risk of drug interactions in patients on multiple medications.	
Rumah Sakit Umum Daerah Wlas Asih Prov. Jawa Barat <i>Pharmacist Professional Practice – Hospital</i>	November 2025 – December 2025
- Managed pharmacy inventory and supply chain distribution across central and specialized hospital pharmacy depots to optimize clinical pharmacy workflows and drug accessibility. - Apply aseptic techniques when mixing sterile injectable medications and handling cytotoxic drugs to maintain product sterility and eliminate the risk of contamination and exposure.	

ORGANIZATION EXPERIENCE

Desa Ciburial - Kuliah Kerja Nyata (KKN) <i>Crew</i>	July 2024
- Educating the public on household waste management through training on how to make eco-enzymes to reduce organic waste and create useful products. - Conducting door-to-door mosquito larvae inspections and environmental sanitation campaigns to reduce the risk of the spread of Dengue Hemorrhagic Fever (DHF). - Socializing the basics of pharmacy and demonstrating proper handwashing with soap (CTPS) methods to raise awareness of Clean and Healthy Living Behaviors (PHBS) from an early age.	

- Facilitate the smooth operation of routine Posyandu (community health posts) in collaboration with village health workers to optimize basic health services and monitor the growth and development of toddlers.
- Promote programs for the cultivation and use of Family Medicinal Plants (TOGA) to empower the community toward self-reliance in herbal-based alternative medicine..

Humas Bakti Desa 2022 – BEM FMIPA UNISBA

June 2022

Crew

- Periodic dissemination of health information to local residents to improve health literacy and raise awareness about the prevention of communicable and noncommunicable diseases.
- Facilitating tutoring and basic literacy programs for children to eradicate illiteracy and foster a love of reading from an early age.
- Screening and monitoring vital signs and clinical parameters (blood pressure, blood sugar, and cholesterol) to support the early detection of risk factors for degenerative diseases in the community.
- Building relationships and maintaining active communication with community leaders and residents to identify community health needs and ensure the smooth implementation of community service programs.

Korps Protokoler Mahasiswa UNISBA

2022 – 2024

- Led protocol coordination for university academic and non-academic events.
- Coordinated cross-functional teams to ensure smooth event execution.
- Managed publication, documentation, logistics, and public relations across multiple university program.
