QA Engineer with 6+ years of experience in manual and automation testing for SaaS, web, mobile, and API applications. Experienced working with Indonesian and Japanese technology companies in Agile environments, ensuring software quality through comprehensive test planning, regression testing, defect analysis, and cross-functional collaboration. Skilled in Playwright, Selenium, CI/CD, and test documentation, with strong communication abilities in remote international teams. Passionate about delivering reliable user experiences and continuously improving QA processes

Skills & Proficiencies

• **QA & Testing**

- Manual Testing
- Regression Testing
- Functional Testing
- Integration Testing
- Exploratory Testing
- API Testing
- UI/UX Testing
- Test Case Design
- Defect Tracking

• **Automation & Tools**

- Playwright
- Selenium WebDriver
- Postman
- JMeter
- Jenkins
- TestRail
- Jira
- Git

Methodologies

- Agile/Scrum
- SDLC/STLC
- CI/CD
- Root Cause Analysis

Programming

- JavaScript
- Ruby
- Cucumber

Certification

- ISTQB – Certified Tester
Foundation Level v4.0

Educational Background

🎓 Bachelor of Computer Science
Brawijaya University (2015–2019)
GPA: 3.49 / 4.00

Professional Highlights

- 6+ years of QA experience across SaaS, HRIS, Payroll, Finance, and Logistics systems
- Experience working with Japanese and international teams in remote environments
- Strong background in manual testing with automation experience using Playwright and Selenium

Work Experience

Jitera – QA Engineer (Oct 2024 – Mar 2026)

- Conduct end-to-end manual and regression testing for Japanese SaaS web applications to ensure product reliability and usability.
- Design, document, and execute detailed test cases based on business and functional requirements.
- Collaborate closely with developers, product managers, and designers to resolve issues and improve product quality.
- Perform integration testing between Salesforce and internal web platforms.
- Participate actively in Agile ceremonies and contribute to QA process improvements.
- Develop automated test scripts using Playwright to improve testing efficiency and regression coverage.
- Communicate testing progress and findings effectively with international stakeholders in remote environments.

Mekari – QA Engineer 2 (Mar 2021 – Oct 2024)

- Performed manual testing for HRIS, Payroll, and Financial SaaS platforms across web and API services.
- Created and maintained detailed test cases, test scenarios, and testing documentation.
- Conducted functional, regression, integration, and exploratory testing to ensure software quality and stability.
- Collaborated with developers, product managers, and support teams to validate requirements and resolve issues efficiently.
- Developed and maintained automation scripts using Selenium to support regression testing activities.
- Integrated automated testing into Jenkins CI/CD pipelines to improve release quality and deployment confidence.
- Performed API and performance testing using Postman and JMeter.

Puninar Logistics – QA (Oct 2019 – Feb 2021)

- Created test cases and performed functional testing on API, mobile, and web apps.
- Monitored release quality and documented test findings across multiple projects
