SUMMARY

An Associate Product Owner with nearly four years of experience in digital product development using Agile/Scrum methodologies. Proven expertise in managing product backlogs, writing technical user stories, and collaborating with cross-functional development teams to deliver IT solutions that align with business goals and user needs.

PROFESSIONAL EXPERIENCE

**Associate Product Owner, EX-Mandala Multifinance, Tbk -
Akuisisi PT Adira Finance**

November 2022 - Present

- Defined and communicated product vision and roadmap in alignment with strategic business objectives.
- Developed and implemented web and mobile products based on business requirements using Agile methodologies.
- Managed and prioritized the product backlog to determine feature delivery for each Agile sprint.
- Organized and monitored cross-functional squads, including UI/UX Designers, Backend/Frontend Developers, and QA Engineers, to ensure successful feature development.
- Collaborated with other product squads to streamline cross-team feature dependencies and development.
- Conducted User Acceptance Testing (UAT) and managed user onboarding/training for newly launched systems.
- Partnered with the DevOps team to facilitate smooth product deployments to production environments.

Software Quality Assurance, PT. Mandala Multifinance, Tbk

April 2022 - October 2022

- Created comprehensive test scenarios for features across mobile and web platforms.
- Collaborated closely with developers to identify, track, and resolve bugs or technical issues in developed features.
- Executed integration testing in coordination with other product squads.
- Developed automated testing scripts using Cypress, Selenium, and Appium to optimize testing efficiency.
- Assisted end-users during User Acceptance Testing (UAT) prior to production deployment.

Data Automation, PT. Astra International, Tbk - Astraworld

July 2019 - March 2022

- Developed Python automation scripts for web scraping and automated data cleansing to support the data analyst team.
- Conducted integration and smoke testing on the internal call center web application in collaboration with external vendors.
- Created detailed test scenarios for internal call center web application testing.
