- Best Oral Presenter | 1st Global Forum on Pharmaceutical and Health Science (GFPHS) 2023.
- Awardee – PKM-RE Research Grant (Ministry of Education) 2023.
- Most Outstanding Student of Faculty Pharmacy 2022, 2nd Winner |Ahmad Dahlan University.

RELEVANT PROFESSIONAL EXPERIENCE

Quality Assurance Intern (PT. Balatif – Herbal Division)

October–November 2025

- Received induction from various departments including Marketing & Sales, Production, Quality Assurance, Quality Control, Product Development, and Engineering.
- Exposed to GMP-based Quality Assurance systems in pharmaceutical manufacturing. Supported Quality Assurance operations by assisting in validation and calibration activities.
- Supported documentation and reporting activities, including preparing supplier audit reports, SIINAS reports, and audit recaps.

Pharmaceutical Distribution Intern (PT. Millennium Pharmacon International)

September 2025

- Learned administrative processes of pharmaceutical distribution and ensured compliance with Indonesian Good Distribution Practice.
- Participated in stock opname/physical inventory checking, order preparation, and documentation practices for drug and medical devices distribution.

Hospital Pharmacy Intern (RSI Sultan Agung Semarang)

July–August 2025

- Exposure to hospital drug formularium systems, including drug selection criteria, and planning processes.
- Assisted in pharmaceutical reimbursement administration by compiling & verifying BPJS claim data, gaining exposure to healthcare reimbursement systems and claim process.
- Performed clinical pharmacy activities, including dispensing, medication counseling, and monitoring drug therapy and adverse drug reactions.
- Learned and performed hospital pharmacy management processes, including procurement, storage, distribution, and inventory control of pharmaceuticals and medical devices.

Public Health Pharmacy Intern (Dinas Kesehatan Kulon Progo, Yogyakarta)

April 2025

- Analyzed drug demand planning using consumption and morbidity-based methods across multiple primary healthcare centers.
- Gained exposure to pharmaceutical procurement decision-making, including pricing, national formularium (FORNAS), and e-catalog systems.
- Learned distribution and supply chain processes to ensure product availability across healthcare facilities.
- Learned inventory and reporting systems (e-Monev, SIPNAP, SIMOKU) for stock monitoring and data-based evaluation.

Primary Healthcare Pharmacy Intern (Puskesmas Pakualaman Yogyakarta)

April 2025

- Conducted drug demand planning (LPLPO) and evaluated planning effectiveness.
- Participated in distribution and supply chain processes across primary healthcare services.

- Utilized health information systems (SIMPUS) for inventory monitoring and reporting.
- Developed understanding of primary healthcare system, healthcare referral system, and capitation scheme.

Community Pharmacy Intern (Apotek UMY) May 2025

- Delivered OTC and prescription services, combining clinical screening, counseling, and effective product recommendation, resulting in successful sales to consumers.
- Supported inventory control and daily pharmacy operations.
- Conducted a feasibility case study for the establishment of a new community pharmacy.

Practicum Teaching Support (Universitas Ahmad Dahlan) 2023-2025

- Related Subjects : Physical Pharmacy; Sterile Dosage Form Formulation, Technology, and Analysis; Biopharmaceutics; Solid Dosage Form Formulation and Technology ; Phytochemistry
- Roles during the practicum: Assisted in guiding and evaluating student’s performance during practicums and providing the practical example during practical session.

PROJECT EXPERIENCE

1. PKM-RE Grant Awardee: Natural–Based Sunscreen as a Non-Carcinogenic Sunscreen

Roles in the project :

- Involved in the early-stage product lifecycle from development to commercialization, including ideation, formulation, product promotion, and execution of digital marketing campaigns.
- Executed digital marketing campaigns using Instagram Meta Ads, achieving 20,000+ impressions and increasing public awareness and engagement.
- Contributed to research resulting in a patent (ID: IDS000007400) and peer-reviewed publication.
- Gained exposure to early-stage product commercialization through direct product exhibitions and public engagement.

2. Product Development Project : Bisoprolol Tablet (Academic Project during Elective Study)

- Conducted competitor and patent analysis to evaluate market positioning and generic opportunities.
- Developed an end-to-end pharmaceutical product concept using Quality by Design (QbD) approach, including QTPP, CQA, and process parameter identification.
- Designed product formulation, manufacturing process, and evaluation parameters to ensure product quality and stability.
- Developed packaging concepts and patient information materials to support product usability and compliance.
- Analyzed regulatory requirements and outlined product registration process based on BPOM guidelines.

3. Bachelor’s Thesis: Porang Starch–Based Sunscreen Formulation with Titanium Dioxide

- Developed the study as a continuation of prior research on porang tuber starch as a natural sunscreen active ingredient.
- Developed and evaluated sunscreen formulation combining porang starch and titanium dioxide.
