Professional Overview

MBA and a qualified **Lean Six Sigma Black Belt**, a results-oriented **head of operations** with over ten years of extensive experience in high-stakes operational consulting, pharmaceutical production, and multinational consumer health. Provide the quantifiable results, including:

- **Accelerated the end-to-end process and documentation** at Mulia Farma Suci for solid, liquid, and semi-solid lines, reducing the timeframe from over 2 weeks **to an average of just 1 week**.
- **Achieved a \$22 million USD EBITDA impact** through strategic project management at Pertamina International Shipping.
- Robust quality and process controls successfully **prevented IDR 1.1 billion in project write-offs** at Bayer Indonesia.
- **Managing** large-scale production processes, leading activation **of the new IBC machine** at Bayer Indonesia **enhanced mixing capacity by 200%**.

Work Experience

Production Manager

Mulia Farma Suci

March 2026- Now

- Lead Time Efficiency: decrease production lead times and batch record closure from months to 7 days after packing, improving product lead time.
- Process Control & Yield Optimization: Maintained a consistent average finished-goods yield of 97% across Solid, Liquid, Semi-Solid, and Beta-Lactam production lines starting March 2026, driven by rigorous process controls.
- OE Leadership: Lead Site Leadership Weekly Meetings and corporate plant Operational Excellence (OpEx) Pillars to align cross-functional performance with business goals.

Project Management Office Consultant

MagnaQM

April 2024 - Feb 2026

- Developed the first ACMP-accredited change management program in Indonesia , creating an internationally recognized program in 2025.
- Coordinated the PMO service for Pertamina's International Shipping Asia Pacific-Middle East initiatives, enhancing efficiency, which resulted in a \$22.2 million USD EBITDA impact in FY 2024.

Interim Project Manager

Human Plus Institute

August 2023 - April 2024

- Increased operational efficiency by decreasing patient lead time by 20% across client clinic branches through the strategic application of lean queue management systems.
- Implemented a cost-reduction strategy projected at IDR 370 million by enhancing workforce efficiency for a developing start-up.

- A3 Problem Solving with CIL and MTBF (January-May 2022)
- Activation turret replacement for 2 Compression machine (March- August 2021)
- SMED & Lean Change over for Compression machine (August - November 2020)
- Activation 2 new IBC Blender unit in Pt Bayer Indonesia (February - July 2019)
- Activation 3 new Dry heat Oven unit in Pt Sanbe Farma (March- August 2016)

Warehouse Senior Supervisor & SCM Project Specialist

PT Bayer Indonesia June 2022- August 2023

- Enhanced export logistics on-time delivery by ensuring a loading lead time of under 2 hours for all shipments, reaching a 92% success rate through the implementation of a Lean-system approach.
- Led a vital cost-management initiative that prevented IDR 1.1 billion in potential write-offs (Q3-Q4 2022) through a write-off avoidance inventory project.

Production Compliance & Project Specialist

PT Bayer Indonesia February 2021- May 2022

- Successfully reduced material waste by 15% for high-volume tablet SKUs through the implementation of continuous improvement strategies, application of CIL (Clean, Inspect, Lubricate) methods, and enhancement of MTBF (Mean Time Between Failures) metrics.
- The strategic execution of a turret set replacement project led to a 50% improvement in operational efficiency for essential production SKUs, significantly alleviating mechanical limitations and accelerating output speed.

Production Shift Supervisor

PT Bayer Indonesia September 2017 - February 2021

- Agile Logistics: Implemented automated Kanban and visual workplace systems in the packaging department, successfully securing a 95% service consistency rate for Semi-Finished Goods (SFG).
- Capacity Expansion: Led the validation and commissioning of a new Intermediate Bulk Container (IBC) Blender machine, achieving a 200% surge in mixing throughput per shift via SMED principles.

Production Assistant Manager

PT Sanbe Farma March 2017 - September 2017

- Overseeing production and packaging operations to meet all manufacturing targets, adhere to OPEX and CAPEX budgets, and optimize resources.
- Ensured the facility passed crucial regulatory inspections, BPOM CPOB (GMP) accreditation, and Uganda National Drug Authority (NDA) and WHO

Production Supervisor

PT Sanbe Farma May 2014- February 2017

- A comprehensive competency mapping and cross-training program for core operators ensured a versatile and resilient staff, increasing production schedule agility by 20% in the high-risk aseptic zone.
- Led the activation of three new dry oven units across three aseptic lines, speeding sterilization and batch throughput and reducing operational transportation time by 30%.
