Dear Hiring Manager of PT. Mersi Farma

As a fresh graduate with hands on experience in the pharmaceutical industry, I am excited to apply for the Product Executive position at PT. Mersi Farma. I am highly motivated to begin my professional career in product marketing, where I can combine analytical thinking, market understanding, and cross functional collaboration to contribute to business growth.

During my time in Research & Development at PT Bayer Indonesia, I was involved in formulation development, product trials, and cross functional coordination to ensure product readiness prior to commercialization. This experience strengthened my analytical skills and provided me with a solid understanding of product value, competitive positioning, and the importance of aligning technical development with market needs.

Subsequently, in my role as PPIC at PT Graha Farma, I managed production planning and inventory control to ensure supply availability aligned with demand forecasts. This role enhanced my ability to work with data, prepare structured reports, coordinate across departments, and maintain operational efficiency all of which are highly relevant to developing market analysis, supporting promotional execution, assisting in customer engagement, and preparing performance reports.

Although I am at the beginning of my career, my exposure to both product development and operational planning has equipped me with a comprehensive understanding of how products move from concept to market. I am proactive, detail oriented, and eager to continuously learn while contributing meaningfully to your Sales and Marketing team.

I would welcome the opportunity to further discuss how my background and enthusiasm can support PT. Mersi Farma. Thank you for your time and consideration.

Sincerely,
Caroline Karin Kristanti
