SUMMARY

Licensed Pharmacist with hands-on experience in pharmaceutical manufacturing and product development through professional internship in the pharmaceutical industry. Experienced in product design and development documentation, verification and validation, product evaluation, stability study documentation, production process evaluation, and SOP implementation. Familiar with GMP/CPOB requirements and pharmaceutical formulation for solid, liquid, and sterile dosage forms, supported by pharmaceutical laboratory experience. Strong analytical, documentation, communication, and cross-functional collaboration skills, with a systematic, detail-oriented, and adaptable approach to supporting product development and process improvement.

EDUCATION

HASANUDDIN UNIVERSITY, FACULTY OF PHARMACY Makassar, Indonesia
Pharmacist Professional Program 2025 – 2026
GPA: 3.96/4.00 | *Cum Laude* honors

HASANUDDIN UNIVERSITY, FACULTY OF PHARMACY Makassar, Indonesia
Bachelor of Pharmacy 2020 – 2024
Undergraduate thesis: Validation of UV-Vis spectrophotometry analysis method for measuring clindamycin in rat skin tissue.
GPA: 3.43/4.00 | Student Representative of ASIIN International Accreditation | Silver Medalist Presentation Category of 36th National Student Scientific Works (PIMNAS-36) through Student Creativity Program (PKM)

SILPAKORN UNIVERSITY, FACULTY OF PHARMACY Nakhon Pathom, Thailand
International Summer Course Mobility Student RxSU 2023 June 2023

INTERNSHIP EXPERIENCES

HERMINA HOSPITAL Makassar, South Sulawesi
Pharmacist Intern/PKPA September – October 2025

- Performed prescription screening and medication dispensing for inpatient and outpatient services.
- Managed pharmaceutical logistics and medication distribution in accordance with patient safety standards.
- Monitored medication therapy and supported appropriate medication use.
- Provided patient counseling to promote safe medication use and improve treatment adherence.

PT. SETIA ANUGRAH INDONESIA Cikarang, Bekasi
Pharmacist Intern/PKPA June – August 2025

- Participated in pharmaceutical product development and improvement activities within a pharmaceutical manufacturing environment.
- Prepared and developed Product Design & Development documentation, including Design Plan, Input, Output, Verification, and Validation documents.
- Supported product verification and validation against predefined specifications and requirements.
- Participated in production process evaluation and SOP implementation to support process compliance and improvement.
- Supported stability study documentation and product quality evaluation.
- Supported raw material and finished product testing for product evaluation.
- Collaborated with cross-functional teams throughout product development and manufacturing activities.

PT. KIMIA FARMA APOTEK Makassar, South Sulawesi
Pharmacist Intern/PKPA May – June 2025

- Managed the medication procurement cycle, including needs planning and ordering to pharmaceutical wholesalers (PBF).
- Performed clinical and administrative screening of prescriptions to ensure appropriate indications, dosages, and to identify potential drug interactions.
- Provided professional consultations to patients regarding the proper use, storage, and potential side effects of medications.
- Ensured stock accuracy by reconciling physical inventory/stock opname with digital systems and performed regular monitoring of medication expiry dates to maintain product quality.

PT. PARIT PADANG GLOBAL Makassar, South Sulawesi
Pharmacist Intern/PKPA April – May 2025

- Implemented GDP/CDOB standards across pharmaceutical receiving, storage, and distribution processes.

- Monitored warehouse conditions, temperature, and humidity to maintain pharmaceutical product quality.
- Verified invoices, purchase orders and distribution documents to ensure accuracy and regulatory compliance.
- Conducted stock opname and FEFO implementation to maintain inventory accuracy and minimize product expiry risk.

PHARMACEUTICAL LABORATORY OF HASANUDDIN UNIVERSITY Makassar, South Sulawesi
Pharmaceutical Laboratory Assistant August 2023 – July 2024

- Assisted pharmaceutical formulation and compounding of solid, liquid, semi-solid, and sterile dosage forms.
- Conducted pharmaceuticals and physical pharmacy experiments.
- Assisted students in laboratory practices and pharmaceutical product evaluation.
- Ensured compliance with laboratory safety and procedures
- Coordinated and assessed performance across 4 practicum shifts.

AIESEC in UNHAS Makassar, South Sulawesi
Outreach Team Leader of Business Development Department February 2022 – January 2024

- Developed and executed partnership strategies for 100+ community, NGO, government, and media stakeholders with 95% partner satisfaction rate.
- Managed 30+ end-to-end partnership lifecycle (outreach, onboarding, engagement, monitoring, and evaluation).
- Implemented External Stakeholders Standard Minimums (ESSM) tracking system to ensure compliance and performance.

PROJECT
STUDENT CREATIVITY PROGRAM (PKM) Makassar, South Sulawesi
Team Member November 2022 – November 2023

- Conducted pharmaceutical research and product development activities.
- Collected and analyzed research data to support study outcomes.
- Developed innovative drug delivery system concepts.
- Contributed to research findings and International journal publication

CERTIFICATIONS, TRAINING, LICENSES

- **Good Manufacturing Practice (GMP) Training** – Makin Ahli, June 2026.
- **Quality Assurance (QA) in Pharmaceutical Industry Training** – Makin Ahli, June 2026.
- **Pharmacist Registration Certificate/STRA** – Indonesian Health Council, May 2026
- **Pharmacist Competency Certificate/Serkom** – Indonesian College of Pharmacy, April 2026

PUBLICATIONS

- **Journal of Pharmaceutical Research Springer (SCOPUS-Q1)** – “Selective Delivery of Clindamycin Using a Combination of Bacterially Sensitive Microparticle and Separable Effervescent Microarray Patch on Bacteria Causing Diabetic Foot Infection”. (2024)
- **Journal of Analytical Sciences Springer Nature (SCOPUS-Q3)** – “Validation of spectrophotometric and colorimetric methods to quantify clindamycin in skin tissue: application to in vitro release and ex vivo dermatokinetic studies from separable effervescent microarray patch loaded bacterially sensitive microparticle”. (2023)

ACHIEVEMENTS

- **2nd Place of 36th National Student Scientific Works (PIMNAS-36)** through Student Creativity Program (PKM). (2023)
- **Selected Student over 5.000+ applicants** for Attending International Summer Course Mobility Student RxSU 2023 Fully Funded Program held by Silpakorn University, Thailand. (2023)
- **Awardee of Cendekia Badan Amil Zakat Nasional (BAZNAS) Scholarships.** (2022)
- **2nd Place of National Scientific Papers** of Tirtayasa Research Academic Society and Festival. (2022)
- **Grant Funds** of Student Entrepreneurship Program (PMW)
- **1st Place Best Position Paper** of International Model United Nations Conference. (2021)

Technical Skills: Pharmaceutical Product Development | Pharmaceutical Formulation | Trial & Product Evaluation | Verification & Validation | Production Process Evaluation | SOP Implementation | Stability Study | GMP/CPOB | Pharmaceutical Analysis | UV-Vis Spectrophotometry | Pharmaceutical Compounding | Microsoft Office (Word, Excel, PowerPoint) | Google Workspace.

Soft Skills: Analytical Thinking | Problem Solving | Communication | Cross-functional Collaboration | Coordination | Detail-oriented | Systematic Working | Teamwork | Adaptability | Time Management.

Language: Intermediate Level in English; Conversational Proficiency in Bahasa.
