WORK EXPERIENCE

PT Beta Pharmacon (Dexa Group) – Karawang, Indonesia

Sept 2025 – Oct 2025

Pharmacist Professional Internship — Quality Control

- Performed regulatory and standard gap assessment of stability testing procedures, supporting alignment with the latest BPOM regulations (Per-BPOM No. 6 2025) and ICH Q1A-Q1F guidelines
- Managed reagent inventory and mapping for physicochemical testing of raw materials, contributing to improved inventory management accuracy and compliance with the Indonesian Pharmacopoeia
- Participated in analytical method transfer activities by updating analytical methods, reference standards, working standards, instruments, and reagents, supporting Quality Control operations and compliance with current analytical procedures
- Calculated and recorded microbiological samples volume, converting quantities into required petri dish allocations, generated trend analysis data, and optimized efficient incubator space utilization and samples receipt planning
- Assisted in and observed Out-of-Specification (OOS) investigations, supporting Quality Control operations
- Observed raw material and packaging material receiving, storage, sampling, and handling, including quality acceptance limit, identification of raw materials, defect categories, and raw material and packaging material inspection
- Gained hands-on exposure to quality control workflows through Working Instructions (WIs), including sample handling, retained sample handling, working standard and reference standard, environmental monitoring, and laboratory testing
- Gained cross-functional exposure to pharmaceutical manufacturing through structured learning across Quality Control, Quality Assurance, Production, Technical Services, Engineering, and Warehouse, developing knowledge of pharmaceutical quality systems, validation and qualification, regulatory compliance, and technology transfer
- Completed company training programs on Good Manufacturing Practice (GMP), Good Documentation Practice (GDP), Data Integrity, and the Halal Assurance System

Apotek Medika Antapani – Bandung, Indonesia

Aug 2025

Pharmacist Professional Internship

- Delivered pharmaceutical care by providing drug information services and patient counseling, promoting medication safety, appropriate medicine use, and adherence to prescribed therapy
- Reviewed, screened, and dispensed over 200 prescriptions in the Clinical Pharmacy Installation, ensuring prescription accuracy, identifying potential medication-related problems, and supporting safe pharmaceutical care
- Participated in inventory management by maintaining stock accuracy, monitoring inventory movement, and supporting efficient pharmaceutical supply planning
- Provided self-medication consultations by assessing patient needs and recommending appropriate OTC medications, ensuring safe, effective, and rational medicine use

PT Teknologi Medika Pratama – Depok, Indonesia

Jul 2025

Pharmacist Professional Internship

- Reviewed and approved over 100 purchase orders and invoices for precursor, controlled, and regular drug orders, ensuring accuracy and compliance with Standard Operating Procedures (SOP) and Good Distribution Practice (GDP) requirements
- Inspected returned products and sampled incoming orders to verify products quantity, quality, and conformity with purchase orders, contributing to improved inventory accuracy and compliance with Standard Operating Procedures (SOPs)
- Developed a comprehensive understanding of end-to-end pharmaceutical distribution processes and workflows through cross-functional learning across Warehouse, Inventory Control, Logistics, and Responsible Pharmacist operations
- Developed training materials on proper pharmaceutical product handling, supporting to improved warehouse staff competency and operational performance

Immanuel Hospital – Bandung, Indonesia

May 2025

Pharmacist Professional Internship

- Performed prescription screening, medication reconciliation, dispensing, and distribution, ensuring prescription accuracy and preventing medical errors, and promoting safe and rational medication use
- Analyzed and reported adverse drug reactions (ADR) through the e-MESO reporting system, supporting pharmacovigilance activities and contributing to improved patient safety

- Participated in ward rounds and performed drug therapy risk assessment for inpatients by evaluating potential drug interactions, adverse effects, and therapeutic responses to optimize effective treatment outcomes
- Supported inventory control by assisting with pharmaceutical storage, distribution, and stock order reviews across pharmacy installations, contributing to inventory accuracy and efficient drugs distribution

UPTD Puskesmas Padasuka – Bandung, Indonesia
Apr 2025

Pharmacist Professional Internship

- Delivered health promotion programs on chronic disease management, including diabetes mellitus and hypertension, as part of pharmaceutical care to improve public awareness and encourage appropriate healthcare practices
- Provided patient counseling on the proper administration of medications requiring special administration techniques, including suppositories and vaginal ovules, to promote safe and effective medication use
- Reviewed, screened, dispensed, and distributed over 250 outpatient prescriptions while providing proactive and passive drug information services, promoting medication safety, rational medicine use, and treatment adherence

Dinas Kesehatan Provinsi Jawa Barat – Bandung, Indonesia
Apr 2025

Pharmacist Professional Internship

- Developed a comprehensive understanding of government healthcare programs, current healthcare regulations, cold chain management, SIPNAP and SIMONA reporting systems, national pharmaceutical service standards, and pharmaceutical distribution processes across provincial and municipal warehouses
- Conducted case study analyses of BPOM inspection findings and developed Corrective and Preventive Action (CAPA) plans based on root cause analysis and regulatory requirements

Bandung Islamic University – Bandung, Indonesia
Sept 2024 – Jan 2025

Laboratory Assistant

- Facilitated pharmaceutical physics laboratory sessions for over 100 students, covering drug stability, solution and solubility, interfacial phenomena, micellization, viscosity and rheology, dispersion systems, and dissolution testing
- Supervised laboratory practical sessions involving experimental preparation, data collection, calculations, result interpretation, and scientific discussions to strengthen understanding of pharmaceutical formulation principles
- Evaluated student performance through pre-tests, laboratory reports, examinations, and Objective Structured Clinical Examination (OSCE) assessments according to university academic standards
- Supported pharmaceutical research projects by assisting in formulation development, stability studies, laboratory experimentation, data analysis, and scientific documentation

Accreditation Pharmacist Professional Program Staff

- Managed accreditation documentation by organizing and maintaining pharmacist professional program records, ensuring document traceability, accessibility, and compliance with institutional accreditation requirements

Indonesian Pharmacy Olympiad Mentor (Pharmaceutical Science)

- Developed learning materials, practice examinations, and study schedules for pharmaceutical science competitions, strengthening student’s understanding of pharmaceutical sciences and industry
- Monitored students progress and reported learning outcomes and competition performance to supervising lecturers for continuous evaluation and program improvement

EDUCATION

Bandung Institute of Technology – Bandung, Indonesia
2025 – 2026

Production and Quality Control Pharmacist with a 3.86/4.00 GPA

Bandung Islamic University – Bandung, Indonesia
2020 – 2024

Bachelor of Pharmacy with a 3.73/4.00 GPA

SKILL

- Ms. Office (skilled in the use of MS Office, particularly Excel, Word, Outlook, and PowerPoint) and WPS Office
 - Laboratory instruments and tools such as Spectrophotometry, Chromatography, Dissolution Tester, Disintegration Tester, LAF, and Viscometer
 - Understanding in Data Integrity, Good Manufacturing Practice (GMP), Good Document Practice (GDP) and Good Laboratory Practice (GLP)
 - Written and spoken Indonesia (native) and English (Proficient for Working)
 - Collaborate with clear communications both verbal and non-verbal with good leadership and coordination
 - Proven proactive, analytical, research, and problem solving
 - Quickly build relationships within the team based on honesty
 - Organized, detail-oriented, accurate data reporting, with strong time management skills
