WORK EXPERIENCE

PT Anugrah Amarta Global – Bogor, Indonesia

Pharmacist Intern – Compliance Department

Mar 2026 – Apr 2026

- Shadowed GMP and GDP inspections across production, packaging, QC, and utility areas, covering cleanliness, facilities, safety, and documentation compliance. Assisted in identifying previously overlooked non-conformities.
- Conducted gap assessments by comparing and evaluating internal SOPs against Deka Group Corporate Policies. Ensured alignment with all relevant requirements and key standards established by the corporate.
- Assisted the Technical Service Department in conducting In-Process-Control (IPC) during filling trials for suspension and syrup products, including deliverable volume testing.
- Developed training materials, including PowerPoint presentations and quizzes, on the general use and functions of checklists for the QC, Warehouse, and Engineering departments. Observed the training sessions.

Rumah Sakit Umum Pusat Fatmawati – Jakarta, Indonesia

Pharmacist Intern

Jan 2026 – Feb 2026

- Conducted pharmaceutical management and clinical pharmacy services, including inventory management and disposal of pharmaceutical supplies, as well as prescription review, dispensing of compounded and non-compounded medications, providing drug information services, patient counselling, ward rounds, medication history taking, drug therapy monitoring, and adverse drug reaction monitoring.
- Conducted a literature review on the latest combination regimens (oral and injectable therapies) for patients with poorly controlled diabetes, with and without complications.
- Developed patient education materials in the form of five leaflets on commonly used antihypertensive medications, including Amlodipine, Bisoprolol, Candesartan, Captopril, and Nifedipine.

PBF PT Masiva Guna – Jakarta, Indonesia

Pharmacist Intern

Des 2025

- Conducted pharmaceutical management activities, including selection, procurement, storage, inventory control, and distribution of pharmaceutical supplies to pharmacies.
- Analyzed customer complaints related to distribution activities and identified the most prevalent types of non-conformities.

Apotek Roxy Pondok Labu – Jakarta, Indonesia

Pharmacist Intern

Nov 2025

- Conducted pharmaceutical management and clinical pharmacy services, including inventory management of pharmaceutical supplies, as well as prescription review, dispensing of compounded and non-compounded medications, providing drug information services, and drug therapy monitoring.
- Developed Pregnancy Drug Safety Category labels for medications in the Gastrointestinal, Asthma, and Cough & Cold sections to support pharmacists in prescription screening and recommending appropriate over-the-counter medications for pregnant patients.

Puskesmas Kecamatan Makasar – Jakarta, Indonesia

Pharmacist Intern

Oct 2025

- Conducted pharmaceutical management and clinical pharmacy services, including inventory management and distribution of pharmaceutical supplies to sub-health centers, as well as medication use reporting through the national system, prescription review, dispensing of compounded and non-compounded medications, and providing drug information services.
- Developed educational materials, including PowerPoint presentations and health promotion videos, on vitamin A, deworming, and iron supplementation programs. Conducted public health education activities to increase awareness of program participation and the importance of supplement adherence.

Microbiology Laboratory, Faculty of Pharmacy – Depok, Indonesia

Laboratory Assistant

May 2025

- Assisted in the preparation and implementation of microbiology OSCE (Objective Structured Clinical Examination) simulations for Pharmacist Professional Program students.
- Conducted simulations covering sterility testing, Total Plate Count (TPC), and antibiotic susceptibility testing.

PT Dankos Farma Tbk. – Jakarta, Indonesia

Intern - Non Beta Lactam (NBL) Sterile Line Production Department

Jan 2024

- Observed the manufacturing process of injectable dosage forms (vials and ampoules), including the critical process parameters (CPPs) at each stage.
- Shadowed the primary-to-tertiary packaging processes to assess alignment with GMP requirements. Evaluated packaging operator performances, identified process issues and challenges, and assisted in developing appropriate solutions.
- Developed training materials, including PowerPoint presentations and quizzes, on the manufacturing flow and critical process parameters (CPPs) of injectable dosage forms (vials and ampoules). Conducted training sessions to production operators.
