

FAHIMA

082280681237 | ilmia.fahimah@gmail.com | www.linkedin.com/in/fhima

Licensed pharmacist and graduate of Universitas Padjadjaran with hands-on experience in community pharmacy, clinical pharmacy, BBPOM, and the pharmaceutical industry with GMP implementation. Experienced in preparation of production process validation protocols and reports, batch quality documentation, specification documents and standard operating procedures for pharmaceutical raw material inspection, and cosmetic product quality testing in a BBPOM laboratory environment. Accustomed to cross-functional coordination with strong documentation discipline, trained analytical thinking, and a firm orientation toward regulatory compliance.

Work Experiences

PT Errita Pharma - Bandung, Indonesia

Jul 2025 - Aug 2025

Apothecary Intern - Product Development

- Compiled and revised 4 production process validation protocols and reports by reviewing and analyzing batch records to assess compliance with predefined process parameters, acceptance criteria, and applicable CPOB (GMP) requirements
- Compiled batch quality analysis document by comparing physical and critical quality parameters of the test product as specified in the Certificate of Analysis, with a competitor product as a basis for evaluating product quality standard compliance
- Prepared monthly temperature and humidity monitoring evaluation report for the Technical Service and Product Development Department
- Collaborated with the production team during production process validation by monitoring process execution, verifying compliance with approved validation protocols
- Collaborated with the Analytical Development team to update pharmaceutical raw material specification and testing documents based on approved pharmacopeial references
- Performed laboratory-scale production trials according to trial batch document and prepared primary-packaged samples for stability testing

Balai Besar Pengawas Obat dan Makanan - Bandung, Indonesia

Oct 2025

Apothecary Intern – Cosmetic Testing Laboratory

- Verified the physical compliance of 40+ cosmetic samples against the test order as part of the test sample acceptance procedure
- Prepared and tested 50+ cosmetic samples for heavy metal contaminants (Pb, Cd, Hg, and As) using an Atomic Absorption Spectrophotometer with a validated analytical method
- Performed organoleptic evaluations on 50+ cosmetic test samples to support the documentation of test results in the product quality assurance process
