Surabaya, Indonesia

2018-2022

WORK EXPERIENCE

PT Pharmametric Labs

Analytical Development Supervisor

Jakarta, Indonesia

Dec 2025-Mar 2026

- Led and supervised a team of analytical chemists in the development and validation of robust methods in compliance with ICH and USP guidelines.
- Exceeded Certificate of Analysis (COA) issuance targets by 17% (achieving 117% of the monthly KPI) while maintaining 100% compliance with laboratory standards.
- Enhance lab efficiency by completing method validation targets while ensuring full compliance with quality standards and procedures.
- Successfully conducted feasibility studies for new analytical method developments, ensuring 100% on-time delivery within project milestones and regulatory requirements.

PT SOHO Industri Pharmasi

Formulation Development Supervisor

Jakarta, Indonesia

Sep 2025-Dec 2025

- Designed and executed pre-formulation and formulation development studies for oral solid dosage.
- Collaborate with the manufacturing team to transition lab-scale formulations to commercial production.
- Work closely with Analytical, Quality Control, and Regulatory teams to ensure compliance with industry standards.

PT Dankos Farma

Analytical Development Scientist

Jakarta, Indonesia

Apr 2023-Sep 2025

- Developed and validated analytical methods for raw materials and finished products, reducing costs by up to 50%.
- Supervised analytical development projects, ensuring 100% compliance with ICH and USP guidelines for method validation.
- Successfully developed a safe method for oncology products and also established a decomposition method for oncology products.
- Successfully Developed universal method for metal content determination in infusions and eye drops.
- Contributed to successfully completed bioequivalence studies for 2 products.
- Initiated and submitted the first One Point Lesson (OPL) within the R&D Department.

TRAINING

Supervisory Development Program

Developing leadership, communication, and business skills.

2025

Colorcon 2025

Gaining expertise in coating technologies and process optimization.

2025

Pharmaceutical Analytical Development

Focusing on analytical method development and process optimization.

2024

Unlocking Equivalence: Exploring Comparative Dissolution Test	2024
Gaining expertise in method development of comparative dissolution testing	

Managing Your Risk – USP Workshop	2023
Focusing on impurity analysis in compliance with USP guidelines	

Problem Solving	2023
Gaining expertise in problem solving and decision maker	

COMMITTEES AND VOLUNTEERS
