WORK EXPERIENCE

PT. Kimia Farma Plant Banjaran, Bandung

Feb 2020 – Present

Assistant Supervisor & Operations

- Assisted the Supervisor in overseeing daily operations in the Central Weighing area in compliance with quality standards, occupational safety, and GMP requirements.
- Supported task allocation, process scheduling, and monitoring of team productivity and performance.
- Prepared work instructions/SOPs, quality objective reports, and supported operational decision-making.
- Contributed to continuous improvement programs to enhance process efficiency and reduce downtime.
- Maintained effective communication and coordination between team members and supervisors.

Audit Representative (Department Level)

- Represented the department during internal and external audits (ISO, BPOM, Halal, and WHO).
- Prepared documentation, process records, and workplace readiness according to audit requirements.
- Provided clarification and supporting data to auditors.
- Prepared and followed up CAPA (Corrective and Preventive Actions) based on audit findings to improve the quality system.

Field Crosschecker

- Responsible for verifying weighing processes and raw materials according to Batch Records and Transfer Orders.
- Ensured the accuracy of material identity, quantity, condition, and weighing processes.
- Supervised dispensing activities and product lot/batch compliance.
- Verified operator logbooks and weighing documentation..

SAP System Administrator (ERP)

- Managed and ensured smooth SAP (ERP) operations for all Central Weighing activities.
- Calculated raw material requirements based on batch record formulas.
- Checked raw material availability in the system and submitted material requests to the warehouse.
- Generated weighing tags and processed accurate raw material goods issues.
- Managed raw material, batch, and weighing data accurately in real time.
- Coordinated with Production, Warehouse, QC, and QA departments to maintain operational flow.

Raw Material Stock Coordinator

- Controlled and recorded raw material stock in the Central Weighing/Warehouse area while ensuring inventory accuracy.
- Inspected material identity labels, storage locations, and location code compliance.
- Transferred materials to quarantine areas and applied quarantine/rejected labels according to procedures.
- Managed expired and rejected materials while monitoring material movement through SAP.
- Supported interdepartmental raw material distribution with accurate data management.

Field Operator

- Performed process readiness checks for weighing and production activities.
- Received and inspected raw materials.
- Conducted raw material weighing according to procedures.
- Completed batch records and process documentation.
- Maintained logbooks and process records during operations.
- Submitted weighing results and coordinated with Supervisors and Administrators regarding weighing activities.

Pharmacy Assistant

- Prepared, compounded, and dispensed medications according to doctors' prescriptions.
- Educated patients regarding dosage, administration instructions, and potential side effects.
- Managed medication inventory including receiving, storage, documentation, and expiration monitoring.
- Assisted pharmacists with medication usage documentation and reporting to related institutions.
