PROFESSIONAL SUMMARY

Pharmacist Professional Program student at Universitas Padjadjaran with hands-on experience in Quality Control through a Pharmacist Professional Internship (PKPA) at PT Global Onkolab Farma. Experienced in reviewing Quality Control SOPs, supporting product specification and test record revisions, conducting analytical method validation and verification gap analysis, and managing retention and stability samples. Familiar with pharmaceutical quality control practices, GMP/CPOB requirements, laboratory documentation, and pharmaceutical analysis. Proficient in Microsoft Office with a strong attention to detail and commitment to following established procedures and quality standards. Seeking an opportunity as a Quality Control Pharmacist to contribute to accurate, reliable, and compliant pharmaceutical testing and quality control activities.

PROFESSIONAL EXPERIENCE

PT GLOBAL ONKOLAB FARMA (GOF), JAKARTA

Jan 2026–Feb 2026

Quality Control Intern - Pharmacist Professional Internship (PKPA)

- Reviewed Quality Control SOPs and related laboratory documentation to support compliance with GMP/CPOB requirements and laboratory quality standards.
- Supported revision of product specifications and controlled test record formats based on approved analytical method documentation.
- Conducted analytical method validation and verification gap analysis to identify documentation and procedural gaps against applicable quality requirements.
- Assisted analysts during chemical testing activities and observed laboratory testing procedures for pharmaceutical materials and products.
- Supported physical inspection of packaging materials according to established specifications and procedures.
- Managed retention and stability samples, including preparation, stock counting, and documentation of raw materials, finished products, reagents, and reference standards.
- Maintained and reviewed approved supplier and raw material documentation as part of QC quality system activities.
- Prepared a special assignment on retention sample management to support proper sample traceability and storage practices.

ADDITIONAL PHARMACY INTERNSHIP ROTATIONS
