SUMMARY

Energetic and detail-focused Pharmacist with solid experience in formulation development and product enhancement in cosmetics, medical devices, and topical patches. Experienced in working cross-functionally to optimize processes, ensure product quality, and comply with GMP and ISO standards. A young and dynamic professional who embraces creativity, innovation, and continuous improvement in every project. Passionate about growing skills, contributing to impactful R&D solutions, and thriving in collaborative, fast-paced environments

WORK EXPERIENCE

Research and Development Staff, PT. Indo Abadi Sarimakmur

Jan 2022 - Jan 2026

- Successfully developed and supported the commercial launch of 5+ medicated patch products, achieving 100% on time product readiness for registration and commercialization while meeting regulatory and quality requirements
- Led end-to-end formulation development from laboratory scale to commercial scale-up, accelerating development timelines by 20-30% through structured experimental planning, risk assessment, and cross-functional coordination
- Led technical evaluation and qualification of raw materials from local and overseas suppliers, ensuring quality, regulatory compliance, cost efficiency, and supply reliability
- Managed halal documentation for raw materials, proactively monitoring certificate validity and coordinating with vendors to ensure continuous compliance with BPJH regulations and audit readiness
- Improved mixing and drying efficiency, reducing scrap rate and rework frequency, contributing to increased production throughput and improved Overall Equipment Effectiveness (OEE)
- Critically reviewed and approved material documentation (COA, MSDS, TDS, specifications, regulatory & compliance documents) to alignment with GMP, BPOM, and internal quality standards
- Collaborated closely with QA, QC, Production, Engineering, and Regulatory teams to ensure smooth technology transfer and commercialization
- Actively supported process validation and equipment qualification (IQ/OQ/PQ), ensuring full compliance with cGMP, ISO 9001, ISO 13485, and internal QMS standards during audits and inspections
- Managed 5+ concurrent R&D projects, balancing formulation development, troubleshooting, and commercialization priorities while maintaining strict adherence to project timelines
- Provide technical guidance and problem solving support to production during scale-up to routine manufacturing, minimizing process disruptions and ensuring product quality consistency

Research and Development Staff, CV. Dewi Kartika

May 2021 - Dec 2021

- Developed and reformulated skincare products such as body care and skin care,
- Conducted lab-scale development, sensory evaluation, and stability testing under accelerated conditions.
- Adjusted formulations based on raw material availability, cost optimization, and consumer feedback
- Coordinated cross-functional efforts to implement innovative ingredients, enhancing product efficacy and aligning with industry trends
- Collaborated with the marketing and packaging development teams during product conceptualization

EDUCATION

Apothecary • University of Surabaya

2020 - 2021

Minor in Industrial Pharmacy, GPA 3,59/4,00

Bachelor of Pharmacy • University of Surabaya

2016 - 2020

"Green Synthesis Silver Nanoparticle Using Ethanol Extract of Kumis Kucing Leaves as Bioreductor in Various Concentration"

ADDITIONAL INFORMATION

- **Technical Skills** : Microsoft Office Proficiency, Good Manufacturing Practice (GMP), Research and Product Development, Project Management
- **Soft Skills** : Communication Skills, Teamwork, Multitasking Ability, Problem Solving & Analytical Thinking, Detail Oriented
- **Certifications** : Pharmacist Registration Certificate (STRA), ISO Awareness Training
