### SUMMARY

Pharmacist Professional Education candidate with hands-on experience in the pharmaceutical industry and strong exposure to GMP (CPOB), pharmaceutical manufacturing, qualification, validation, and quality systems. Familiar with pharmaceutical production processes, equipment and facility qualification, process monitoring, technical documentation, and continuous improvement. Detail-oriented with strong analytical, documentation, and cross-functional coordination skills, with a strong interest in pharmaceutical product development, manufacturing trials, process optimization, scale-up, and technology transfer.

### EDUCATION
