Licensed Pharmacist and GMP-oriented Production Supervisor with hands-on experience in β -lactam (Penicillin) manufacturing within a segregated production facility. Formerly led 19 operators in a 3-shift system overseeing dry syrup and solid dosage manufacturing operations while ensuring strict adherence to CPOB standards and cross-contamination control requirements. Experienced in batch documentation control (CPB), Master Production Procedure (PPI) execution, and operational monitoring. Delivered measurable operational improvement, increasing tablet compression output by 10% through workflow optimization without compromising compliance or product quality. Supported by validation exposure, bringing structured, risk-aware thinking to pharmaceutical manufacturing environments.

Experience

PT Ifars Pharmaceutical Laboratories

Oct 2024–April 2026

Penicillin Dry Syrup Supervisor

- Supervised β -lactam (Penicillin) manufacturing operations in a segregated facility, leading 19 operators across a 3-shift system to achieve production and quality targets under GMP/CPOB standards.
- Oversaw dry syrup processes (dispensing, mixing, filling, capping, IPC) as well as tablet compression and stripping, ensuring strict segregation control and prevention of cross-contamination.
- Managed production scheduling, manpower allocation, and execution of batch documentation (CPB) in accordance with approved Master Production Procedures (PPI).
- Increased tablet compression output by 10% through workflow optimization while maintaining full compliance and product quality.

PT Caprifarmindo Laboratories

Apr 2024–May 2024

Validation Department Internship

- Supported utility qualification activities by assisting in data collection, statistical analysis, and interpretation of qualification results.
- Assisted in preparing validation protocols and reports in accordance with GMP and regulatory documentation standards.
- Performed statistical data analysis using Minitab to support qualification studies and performance evaluation of utility systems.
- Contributed to validation documentation management to ensure traceability, data integrity, and compliance with regulatory expectations.

Education Level

Muhammadiyah University of Surakarta

Aug 2023–Sept 2024

Apothecary Profession

- (GPA 3.55/4.00)

Muhammadiyah University of Surakarta

Sept 2019–Aug 2023

Bachelor of Pharmacy

- (GPA 3.40/4.00)

Skills and Language

- **Pharmaceutical Manufacturing:** GMP/CPOB Compliance, Penicillin Manufacturing Operations, Mixing & Tablet Compression, IPC Monitoring, Primary Packaging (Dry Syrup & Stripping)
- **Production Management:** Production Planning & Scheduling, Manpower Coordination, Team Supervision (3-Shift Operations), CPB & PPI Documentation
- **Quality & Improvement:** Process Optimization, Root Cause Thinking, Basic Validation Support
- **Tools:** Microsoft Office (Excel, Word, PowerPoint), Minitab (Statistical Analysis)
- **Languages:** Bahasa Indonesia (Native), English (Professional Working Proficiency – TOEP 540).
