PERSONAL PROFILE

A motivated and responsible Pharmacy graduate with strong interest in pharmacist production and manufacturing supervision. Skilled in understanding Good Manufacturing Practices (GMP/CPOB), production planning, and documentation to ensure compliance with regulatory standards. Possess leadership, teamwork, and problem-solving abilities with attention to detail in maintaining production efficiency and product quality. Eager to contribute as a Production Supervisor by ensuring smooth operations, meeting production targets, and supporting continuous improvement in the pharmaceutical industry.

My background in student leadership and organizational involvement has sharpened my communication, coordination, and problem-solving skills. I am confident under pressure, capable of managing multiple tasks effectively, and always open to constructive feedback. I value discipline, continuous improvement, and maintaining high professional standards. With a growth mindset and a commitment to excellence, I am ready to contribute positively to a dynamic pharmaceutical team.
