

MIA SUMIATI

Quality Assurance Engineer

About Me

QA Engineer with 4+ years of experience in web, mobile, desktop, API, and database testing. Experienced in manual testing, API validation using Postman, SQL data verification, SIT/UAT execution, and QA documentation. Currently expanding expertise in test automation using Cypress and Selenium WebDriver to deliver faster and more reliable software releases.

Experience

MNC GROUP

2021 – present

Quality Assurance Engineer

- Performed end-to-end manual testing for web, mobile, and desktop applications throughout the Software Development Life Cycle (SDLC).
- Managed comprehensive QA documentation including Test Plans, Test Scenarios, Test Cases (SIT & UAT), Requirement Traceability Matrix (RTM), and Bug Reports to ensure system quality before release.
- Performed API testing using Postman to validate response accuracy and backend data consistency.
- Executed SQL queries for data validation, troubleshooting, and system integration verification.
- Utilized browser Developer Tools (Network & Console) to analyze errors, validate API responses, and identify root causes of defects.
- Collaborated with developers and product managers to report defects, track progress, and verify fixes.
- Executed regression testing prior to releases to ensure system stability and reliability.
- Gathered and analyzed user requirements to support application development and enhancements.
- Provided user support via email and phone to resolve application-related issues.
- Contributed to continuous improvement of QA processes, documentation, and overall testing workflows.

Professional Training

Sanbercode | QA Engineer Bootcamp

2026 – Completed

- Graduated as Rank 1 among QA Engineer Bootcamp participants.
- API Testing using Postman (Manual Testing, API Automation & Newman)
- Web Automation Testing using Cypress (JavaScript)
- Implemented Page Object Model (POM) architecture
- Applied `cy.intercept()` and `cy.wait()` for network request handling
- Data-Driven Testing
- Git & GitHub for version control

Udemy | Selenium WebDriver with Java

2026 – In Progress

- Currently learning Selenium WebDriver using Java
- Exploring Selenium framework, TestNG, waits, locators, and automation best practices
