Description

Registered Pharmacist (GPA: 3.73) with 2 years of experience as a Pharmacist-in-Charge (APJ) at a national pharmaceutical distributor (PBF) and QA internship in manufacturing. Skilled in handling regulatory reports (BPOM & Kemenkes), quality management (CDOB/CPOB), and supply chain operations. Experienced in using SAP and WMS. Looking for opportunities in Regulatory Affairs, Quality Assurance, Procurement, or other pharmacist roles.

Education

- 2018 - 2022 | Brawijaya University
Bachelor of Pharmacy (S.Farm.) – GPA: 3.45
- 2022 - 2023 | Brawijaya University
Pharmacist Professional Program (Apt.) -GPA 3.73

Work Experience

- 2024 - 2026 | Responsible Pharmacist - PT. Kimia Farma Trading & Distribution Jakarta
 - **Procurement & Inventory Planning:** Forecasted and planned medicine order quantities, processed purchase orders (PO) through SAP, and monitored delivery tracking to ensure 100% product availability according to schedule.
 - **Regulatory Reports:** Checked medicine mutation data via SAP and successfully submitted monthly E-Was (BPOM) and E-Report (Kemenkes) reports on time with 100% accuracy.
 - **Product & Quality Control:** Handled special products (Narcotics, Psychotropics, Precursors, and Cold Chain Products) according to CDOB rules, achieving zero-deviation (no difference) in physical stock.
 - **Outlet Check:** Verified and approved the legal documents and licenses of dozens of new outlets/customers every month to ensure safe distribution.
 - **Halal Certification:** Prepared quality documents for the Halal Product Assurance System (SJPH), successfully helping the branch get Halal Certification from BPJPH on schedule.
 - **Audit Readiness:** Conducted routine self-inspections and handled CAPA (Corrective Action) reports to make sure the warehouse was always ready for internal and external audits.

Internship Experience

Januari - Februari 2023 | PT. Saka Farma Laboratories (Kalbe Consumer Health) – Cikarang

Quality Assurance Intern

- Assisted in implementation of GMP (CPOB) and Pharmaceutical Quality System (PQS)
- Conducted Material Quality Review (MQR) and Product Quality Review (PQR)
- Analyzed process data using Microsoft Excel and Minitab (control charts, process capability)
- Interpreted Cp, Cpk, Pp, Ppk for process performance evaluation
