

ANISA FITRIA

nisasha149@gmail.com | www.linkedin.com/in/anisafitria1211 | 089517000308 | Bandung.

Licensed Pharmacist with a solid academic background and hands-on exposure to GMP, Quality Assurance, and pharmaceutical production through multi-site professional training (PKPA). Gained experience in supporting audit review (including external audit findings), basic CAPA development, and process evaluation such as coating issue analysis, along with exposure to nitrosamine risk assessment, basic validation activities, in-process control (IPC), and formulation development (SNEDDS).

Detail-oriented and eager to learn, with a strong interest in QA Compliance, QA Validation, and Production, committed to maintaining product quality and regulatory standards in the pharmaceutical industry.

EDUCATION AND TRAINING

Pharmacist Profesional Degree (apt.) | 2025-2026

Sebelas Maret University (UNS), Solo.

- GPA: 3.85 / 4.00

Bachelor's Degree in Pharmacy (S.Farm) | 2020-2024

Muhammadiyah University, Bandung.

- GPA: 3.83 / 4.00

Training SNI ISO 9001 & Document Control | 2026 - Now

DDSAZ Laboratory Academy

English Training Program | 2026 - Now

Englishnesia

Training CPOB | 2025

Makin Ahli

- Credential ID 214/AF-0F7/MA/IV-2025

Training QA in Pharmaceutical Industry | 2025

Makin Ahli

- Credential ID 180/AF-0F8/MA/IV-2025

Training Basic Life Support | 2025

RS Orthopedic Prof.Dr.R. Soeharso.

- KT.03.02/F/341530/SER/2025

EXPERIENCES

PT Holi Pharma | Pharmaceutical Industry

July - August 2025

Quality Assurance (QA) – Good Manufacturing Practice (GMP)

- Conducted end-to-end nitrosamine (NDMA) risk assessment across multiple product lines using structured risk matrix and scoring system
- Reviewed external audit findings (Kenvue) and mapped against GMP, PIC/S, CPOB, and ISO standards, contributing to CAPA development
- Supported cleaning validation activities to ensure effective cross-contamination control in shared facilities
- Developed comprehensive QA documentation to support regulatory compliance and audit readiness

PT Kimia Farma Plant | Pharmaceutical Industry

February - March 2024

Research and Development – Formulation, Analysis, Warehouse

- Led coating process improvement project (root cause analysis, optimization and proposing corrective strategies)
- Involved solid dosage manufacturing processes (weighing, granulation, tableting, coating and polishing across multiple production batches)
- Performed in-process control (IPC) to monitor critical quality parameters during production
- Conducted comparative dissolution testing (UDT) to evaluate product equivalence

PT Naturafit Thibbunnabawi International | Pharmaceutical Industry

June 2025

Quality Assurance (QA) – Quality Control (QC) – Warehouse

- Identified CPOTB deviations and proposed CAPA based on risk classification
- Performed raw material QC testing (organoleptic & refractometry)
- Managed material status (quarantine/release/reject)
- Supported dispensing & weighing for production
- Ensured inventory compliance (FEFO/FIFO, labeling, storage)

PT Penta Valent | Pharmaceutical Distribution

November 2025

Administration – Warehouse

- Ensured proper handling of cold chain products to maintain product integrity
- Maintained inventory accuracy through stock opname and documentation control
- Supported CDOB/GDP-compliant documentation and regulatory processes
- Managed receiving, verification, storage, and distribution of pharmaceutical products in accordance with CDOB/CDAKB standards
- Verified batch numbers, expiry dates, quantities, and product conditions to ensure compliance

EXPERIENCES

Prof. Dr. R. Soeharso Orthopedic Hospital | Clinical Pharmacy

April - May 2025

Central Pharmacy, Inpatient, Outpatient, ICU, Operating Room (OR), Warehouse

- Performed comprehensive prescription screening, dispensing, and BPJS verification to ensure accurate, compliant, and rational medication use
- Identified and evaluated Drug-Related Problems (DRPs) through case analysis, supporting evidence-based therapy recommendations (Formularium RS, clinical pathways, SOAP, and DIPIRO)
- Delivered drug information services (PIO) and patient counseling to improve adherence and safe medication use

UNS Hospital | Clinical Pharmacy

December 2025

Interprofessional Education

- Participated in interprofessional case discussions and conducted medication reviews (DRPs)
- Monitored treatment outcomes and contributed to evidence-based therapy recommendations
- Presented case analyses and evaluated hospital systems to improve workflow and patient care

Primary Healthcare Ngargoyoso | Clinical Pharmacy

September - October 2025

Central Pharmacy, Inpatient, Outpatient, Warehouse

- Performed dispensing, compounding, and counseling to ensure rational drug use
- Delivered health promotion for chronic diseases (hypertension, diabetes, dyslipidemia)
- Performed basic clinical screening (BP, BMI, cholesterol)
- Managed pharmaceutical inventory and distribution using FEFO/FIFO principles

Apotek K-24 & Kimia Farma | Clinical Pharmacy

March - July 2019 | September 2025

Central Pharmacy, Inpatient, Outpatient, Warehouse

- Performed prescription screening and dispensing in compliance with pharmacy standards
- Educated patients on proper use of medications and medical devices
- Supported BPJS services and prescription processing
- Maintained inventory control and stock accuracy

Muhammadiyah University | Laboratory Assistant

2022 - 2024

Organic Chemistry, Pharmacognosy, Pharmacology, Solid and Sterile Preparations Assistant

- Prepared materials, reagents, and instruments to ensure efficient laboratory operations
- Supervised students during experiments, ensuring proper technique application and data accuracy
- Ensured compliance with Good Laboratory Practice (GLP) and laboratory safety standards

PROJECT EXPERIENCES

Risk Assessment of Potential Nitrosamine Formation and Contamination – PT Holi Pharma

- Conducted risk-based assessment ($\pm 70\%$ completion) for potential nitrosamine (NDMA) contamination across drug products
- Evaluated 10+ risk factors including API structure, DMF, synthetic routes, solvents, and manufacturing processes
- Developed risk matrix and supporting documentation aligned with GMP and regulatory requirements

SNEDDS Formulation & Stability Study – Muhammadiyah University, *fully funded research project*

- Designed and developed Self-Nano Emulsifying Drug Delivery System (SNEDDS) for nutmeg seed oil
- Evaluated surfactant variation, droplet size, and formulation stability

Troubleshooting Analysis of Film Coating TLD Caplets – PT Kimia Farma Plant

- Conducted analysis of coating process issues, identifying factors affecting coating quality and uniformity
- Evaluated process parameters and material variables contributing to variability
- Proposed improvement strategies to enhance coating consistency and product quality

SKILLS

Technical Skills

- Application of GMP, CPOB, CPOTB, and CDOB principles
- Quality systems: deviation handling, basic CAPA, audit support
- Basic validation: cleaning validation and documentation
- Risk assessment & GMP-aligned documentation
- Manufacturing & quality control: IPC, analytical testing
- Formulation development (QbD approach)
- Proficient in Microsoft Office & Google Workspace

Soft Skills

- Analytical thinking & problem solving
- Detail-oriented and quality oriented mindset
- Adaptable, fast learner, teamwork
- Good communication skills and English comprehension (technical reading & writing)
- Strong learning agility and continuous improvement mindset
