Fresh Graduate Apothecary with a strong interest in pharmaceutical marketing and business, aspiring to build a career as a Product Executive. Possesses a solid foundation in clinical and scientific knowledge, with a strong enthusiasm for continuous learning and staying updated with evidence-based medicine (EBM) and regulatory practices. Gained exposure to market research, consumer insight analysis, and brand-related initiatives through research, organizational involvement, and project-based activities. Experienced in developing campaign ideas and product-related concepts, with familiarity in product positioning, campaign planning, and brand-related strategies based on consumer behavior and market trends. Demonstrates the ability to integrate product knowledge and scientific understanding into structured and insight-driven marketing approaches. Supported by strong analytical thinking, presentation, communication, and collaboration skills, with a structured and adaptable approach in dynamic environments. Highly motivated to contribute to product growth, brand development, and market expansion within the pharmaceutical and healthcare industry.

EDUCATION

Universitas Gadjah Mada

Yogyakarta

Bachelor, Pharmacy | GPA: 3.44/4.00

August 2021 - January 2025

- Bachelor of Pharmacy – International Class (English-based program), completed in 3.5 years.
- 1st Place Winner – JR-Rovation Social Innovation Competition, developing a campaign strategy for Gen Z behavioral change, strengthening skills in strategic thinking, communication, and campaign development.
- Head of Sub-Coordinator in KKN Universitas Gadjah Mada, leading community engagement initiatives in public health education and local business promotion.
- Conducted undergraduate thesis on “Internet Use for Medicine and Common Cold Disease,” analyzing consumer digital behavior in searching for drug information. Research generated insights on most used digital platforms and factors influencing health information seeking behavior, providing relevant input for market research, product promotion strategy, and healthcare communication in the pharmaceutical industry.

Universitas Gadjah Mada

Yogyakarta

Professional Degree, Apothecary Program | GPA: 3.88/4.00

February 2025 - February 2026

- Completed Apothecary program within exposure to pharmaceutical practice across multiple health care settings, including community pharmacy (apotek), primary health care center (puskesmas), pharmaceutical distribution, hospital, and pharmaceutical industry.
- Led Public Relations for a soft skills development program for apothecary students in Universitas Gadjah Mada, responsible for stakeholder engagement, internal and external relations, and event coordination with pharmaceutical industry speakers. Strengthening skills in communication, coordination, and project management.
- Participated in community health service programs, conducting health screening and basic medical check up, supporting public health awareness and improving community engagement and interpersonal communication skills.

WORK EXPERIENCE

PT Nufarindo (Exeltis Indonesia)

Semarang, Indonesia

Production of Solid, Semi Solid, and Liquid, Intern

October 2025 - November 2025

- Supported GMP-compliant production performance evaluation through Overall Equipment Effectiveness (OEE) analysis by reviewing daily machine logbook data across tablet, capsule, and semisolid manufacturing lines, achieving approximately 80% equipment effectiveness in line with internationally recognized pharmaceutical manufacturing standards.
- Contributed to production planning by updating daily schedules and process mapping based on batch and machine utilization data, supporting alignment between planned and actual operations and effective capacity utilization.
- Reviewed Batch Manufacturing and Packaging Records to ensure data integrity in line with ALCOA+ principles, supporting traceability and compliance throughout manufacturing and packaging activities.

- Reviewed serialization and aggregation processes within primary and secondary packaging operations to support product authentication and traceability of regulated pharmaceutical products across the market.

PT United Dico Citas
Pharmacist Professional, Intern

Yogyakarta, Indonesia
July 2025 - July 2025

- Gained working knowledge of pharmaceutical and medical device distribution regulations, aligned with national standards and quality systems.
- Performed inventory stock opname on 200+ items, ensuring 98% accuracy in stock reconciliation between physical inventory and system records.
- Managed and reviewed distribution documentation, including 300+ invoices, purchase orders, calibration records, and Standard Operating Procedures (SOPs), ensuring completeness and proper filing.
- Assisted in compiling and submitting drug sales reports for 12 months, supporting regulatory reporting and maintaining 100% data accuracy through electronic reporting systems (e-Report and e-Wash).

Dinas Kesehatan Daerah Istimewa Yogyakarta
Pharmaceutical, Food, Beverage, and Medical Device Section, Intern

Yogyakarta, Indonesia
September 2024 - December 2024

- Monitored cold chain product performance using Vial Vaccine Monitor (VVM) and temperature tracking systems, ensuring 99% product quality and stability.
- Supported compliance evaluation activities aligned with current Good Manufacturing Practice (CPOB) standards, including documentation reviews and on-site assessments over months.
- Applied updated pharmaceutical manufacturing standards (CPOB) to support regulatory evaluation processes.
- Conducted inventory control and documentation management, including monthly stock checks of 200+ medicines, vaccines, and medical devices, ensuring 100% accurate records and traceability.

Puskesmas Ngampilan
Pharmacist Professional, Intern

Yogyakarta, Indonesia
May 2025 - June 2025

- Provided clinical pharmacy services, managing over 250 prescriptions daily, including dispensing, compounding, and counseling.
- Led community medication education and stunting awareness programs, engaging with over 100 participants.
- Contributed to pharmaceutical management and public health service operations in primary healthcare settings.
- Ensured safe and effective medication use through patient counseling and education.

Apotek Kosudgama
Pharmacist Professional, Intern

Yogyakarta, Indonesia
April 2025 - May 2025

- Delivered pharmacy services handling 20+ prescriptions and 40+ consultations daily. Applied product knowledge and customer-oriented communication for product recommendations.
- Identified patient needs through interaction. Provided drug info and self-medication guidance, enhancing understanding of consumer behavior and product positioning.
- Contributed to pharmacy performance by supporting product promotion and service quality. Increased product utilization through counseling and recommendation strategies.
- Gained exposure to pharmacy business operations, including inventory management and stock control, enhancing understanding of product lifecycle and commercial processes.

ORGANIZATION
