EDUCATION

Bachelor of Pharmacy

Gadjah Mada University

2014 - 2018

GPA : 3.11 of 4.0

Aphotecary

Gadjah Mada University

2018-2019

GPA : 3.86 of 4.0

EXPERTISE

- Leadership
- Good Manufacturing Product
- Manufacturing Process
- Production Improvement

About Me

I am an enthusiastic, dedicated, responsible, hard working person and adaptable to challenging situations with over 6 years experience as production supervisor oral and injection medicine product.

EXPERIENCE

Nov 2021 – Present

PT. Dankos Farma (Kalbe Group)

Production Supervisor Oral Betalactam & Injection Non Betalactam Product

- Handling processes of Cephalosporin Betalactam Group Caplet, Capsule and Dry Syrup Bottle Product from mixing until secondary packaging
- Handling processes of injection non betalactam products including aseptic processing and terminal sterilization, specifically for vial and ampoule forms
- Handling processes of Penicillin Betalactam Caplet Product from mixing until secondary packaging

The Improvement in Production

Production Supervisor Injection (Jan 2025–May 2026)

- Successfully led a production facility relayout project for the Unclassified, Grade F, and Grade E areas in the NBL Injection Building (Kav. 37), managing an approximately IDR 1 billion project budget and ensuring full compliance with Current Good Manufacturing Practice (cGMP), World Health Organization (WHO) guidelines, and applicable national and international regulatory requirements.
- Implemented process improvements to eliminate blister pinhole defects, reducing rework and customer complaints. Cost saving Rp72.354.480
- Optimized the RT550 tunnel sterilization process, eliminating production line stoppages caused by sterilization temperature alarm failures. Cost saving Rp82.372.896
- Improved Batch Record Right First Time (BRFT) documentation compliance from 92% to 98% for the NBL Injection Building (Kav. 37) by implementing weekly performance monitoring, regular classroom training, and an award and accountability program

Production Supervisor Oral (Nov 2021–Dev 2024)

- Represented PT. Dankos Farma at the 2023 Kalbe Innovation Grand Convention, Kalbe Group's annual innovation competition under the theme "Connect & Innovate". Led a successful cost optimization project by redesigning Amoxicillin caplet dimensions, reducing manufacturing costs and delivering annual cost savings of approximately IDR 3.80 billion (IDR 3,800,490,339).
- Led the Quality Control Circle (QCC) team as Facilitator, winning the Gold Medal at the 2022 Grand Convention, "Innovation is the Height of Our Future Evolution". Successfully increased Siebler machine speed from 250 to 270 cycles/minute, boosting production output from 200 to 216 strips/minute and delivering annual cost savings of IDR 1.46 billion (IDR 1,462,507,864).

Production Supervisor Oral (Nov 2021-Dev 2024)

- Selected as PT Dankos Farma's representative to perform the Factory Acceptance Test (FAT) for a JCMCO tablet compression machine in Taichung, Taiwan (2023). Successfully managed a capital investment project valued at approximately IDR 4.2 billion, leading all phases from budgeting, URS preparation, FAT, DQ, IQ, OQ, PQ, SOP development, and commissioning to routine production, ensuring the equipment met regulatory and operational requirements while supporting increased production capacity.
- Led a capital investment project to expand Penicillin caplet manufacturing capacity by converting an underutilized Dry Syrup production line into a dedicated caplet production line. Developed the investment proposal based on capacity analysis, optimized facility utilization, and enabled sustainable production growth to meet increasing customer demand.
- Managed the structural reinforcement and production facility relay layout of the Penicillin manufacturing building to install a new JCMCO tablet compression machine and a Siebler Goring blister packaging machine. Coordinated cross-functional activities, including engineering, validation, and regulatory documentation preparation for BPOM notification, ensuring timely project completion and regulatory compliance.

Sept 2019 – Nov 2021

PT. Novell Pharmaceutical Lab

Production Supervisor Liquid and Softgel Medicine Product

- Handling processes of liquid and softgell from mixing until secondary packaging
- Planning the schedule process of production and increase the productivity of production
- Handling the plotting of assignment about 90 employees

The Improvement in Production

- Increase the yield of filling vaporin softgel, Q-Ten Soft 30, Astatin 4 mg, Nu Q-Ten softgell
- Increase the effectiveness of the production process by reducing the frequency of melting gelatin lots from 2 lots to 1 lot on ostovel 0.25 MCG product, Nu Q-Ten 100 mg softgel and caloma plus blister.

2014 – 2019

Gadjah Mada University

- Delegation in Educational Program of Indonesia : International Certification Multicultural Understanding and Development Exchange South Korea (2017)
- Participate Student Exchange Program in Istanbul University Faculty of Pharmacy Department of Pharmaceutical Toxicology that held by International Pharmaceutical Students Federation IPSF (2018)
- Represented the Faculty of Pharmacy at Universitas Gadjah Mada (UGM) the 2018 Student Creativity Program (PKM) Competition by developing an innovative nano spray formulation using temugiring (Curcuma heyneana) as the active ingredient.
