ABOUT ME

I am a self-driven and highly adaptable fresh graduate pharmacist with strong communication skills, commercial awareness, and a proactive working attitude. During my internship, I developed a solid foundation in Good Manufacturing Practices (GMP) while gaining hands-on experience in technical documentation, which strengthened my attention to detail, data accuracy, and organizational skills. My involvement in In-Process Control (IPC) activities enhanced my analytical thinking and problem-solving abilities, enabling me to assess quality and support decision-making processes effectively. With a strong interest in business development and supply chain operations, I am eager to contribute to cost-efficiency initiatives, including price negotiation and material evaluation, to support efficient procurement and business growth.

EDUCATION

Apothecary Professional Degree, Andalas University	2024 - 2025
▪ GPA: 3.97 (Cum Laude Honours)	
Bachelor of Pharmacy, Andalas University	2020 - 2024
▪ GPA: 3.86 (Cum Laude Honours)	
▪ Final Project Research Area: Pharmaceutical Biology	

WORK EXPERIENCES

Hospital Pharmacy – DR. Drs. M. Hatta Brain Hospital, Bukittinggi, West Sumatera	March – April 2025
▪ Assigned to four different units: Neurology Ward, Internal Medicine Ward, Pediatric Ward, and Pharmacy Department.	
▪ Learned and applied clinical pharmacy services, including prescription review, medication history tracing, medication reconciliation, drug information services, patient counseling, ward rounds, and therapeutic drug monitoring.	
▪ Monitored inpatients, identified irrational drug therapy, and prepared patient case studies related to Drug-Related Problem (DRP) analysis.	
▪ Gained knowledge of pharmaceutical supply management and medical devices, also daily drug distribution to patients using the unit dose dispensing system.	
Industrial Pharmacy (Quality Control Department) – PT. Mutiara Mukti Farma (MUTIFA), Deli Serdang, North Sumatera	January – February 2025
▪ Trained in Good Manufacturing Practices (GMP) to ensure consistent, high-quality, and compliant drug production.	
▪ Learned warehouse operations, drug manufacturing processes, stability testing, microbiological testing, water treatment, and waste management systems.	
▪ Conducted In-Process Control (IPC) in the Quality Control Department, including Loss on Drying (LOD) testing of granules and drug assay using titration methods.	
▪ Archived retained sample documents (QC), including logbook recording of raw materials to finished products (supplier, entry date, QC number, sample quantity, and expiration date).	
Pharmaceutical Distribution – PT. Panay Farmalab, Padang, West Sumatera	December 2024
▪ Applied the pharmacist’s role in drug distribution management based on Good Distribution Practices (GDP).	
▪ Verified accuracy and legality of pharmaceutical and medical devices purchase invoices.	
▪ Managed warehouse operations, including order picking and preparation.	

- Performed final checks to ensure compliance of goods with invoices prior to packaging and distribution.
