

ABDUL YAZID ROZI

SECTION PPIC & WAREHOUSE

0822-9903-9408 | abdulyazidrozi@gmail | Cikarang Selatan, Bekasi

CAREER SUMMARY

PPIC and Warehouse professional with 9+ years of experience in manufacturing. Expertise in production planning, material control, and warehouse management (raw materials & finished goods). Strong in inventory monitoring, ensuring material availability, and aligning system data with actual conditions. Proficient in SAP and Excel, with solid analytical and problem-solving skills.

EDUCATION

Bachelor’s Degree in Industrial Engineering, GPA: 3,59 Universitas Pelita Bangsa	2021 - 2025
High School Diploma SMK Mandalahayu	2012 - 2015

TECHNICAL SKILLS

Production Planning & Control (PPIC)
Material Control & Requirement Planning (MRP)
BOM & Material Requirement Analysis
Warehouse Management (Raw Material & Finished Goods)
Stock Monitoring & Stock Opname
SAP (Material Management / Production)
Microsoft Excel (Pivot Table, VLOOKUP, Data Analysis)
Data Analysis & Reporting
KPI Monitoring & Performance Analysis
Root Cause Analysis & Problem Solving

WORK EXPERIENCE

Supervisor PPIC PT Haier Appliances Indonesia	Feb 2026 – Aug 2026
- Managed production planning and material control to ensure alignment between demand and production capacity. - Monitored and analyzed gaps between production plan and actual output, implementing corrective actions to minimize discrepancies. - Ensured material availability to support continuous production and prevent line stoppages. - Supervised warehouse operations for both raw materials and finished goods, maintaining smooth material flow. - Controlled inventory accuracy through regular stock opname and reconciliation between system and physical stock. - Coordinated with cross-functional teams (production, warehouse, purchasing) to ensure on-time delivery and operational efficiency. - Utilized SAP for material movement tracking, inventory control, and production monitoring.	

- Managed production planning and material control to support daily manufacturing operations.
- Monitored production plan vs actual output and reported discrepancies for operational improvement.
- Ensured material availability and smooth supply to production lines to prevent shortages and line stoppages.
- Handled warehouse operations including receiving, storage, and issuing of raw materials and finished goods.
- Maintained inventory accuracy through regular stock opname and reconciliation between system and physical stock.
- Implemented FIFO system to ensure proper material handling and stock rotation.
- Coordinated with production, warehouse, and purchasing teams to ensure timely material availability.
- Supported purchasing and import-export (EXIM) activities, including shipment monitoring and coordination with suppliers.
- Monitored customer portals for sales orders, delivery schedules, and demand updates to align production and material planning.
- Managed material transactions and inventory data using SAP system.
- Handled and maintained ISO 9001 (Quality Management System) and ISO 14001 (Environmental Management System) documentation and compliance.
- Prepared daily and monthly reports related to production, inventory, and warehouse performance.

- Received and verified incoming materials against delivery documents to ensure accuracy.
- Processed inbound transactions and maintained data accuracy in SAP system.
- Identified and reported discrepancies (quantity/quality) and coordinated with related departments.

KEY ACHIEVEMENTS

1st Place – Internal Kaizen Competition (2021) for implementing process improvements that enhanced operational efficiency.
