

ABDUL HAFIDZ

Logistics | Supply Chain & Warehouse Operations | Pharmaceutical Industry

Bogor, Indonesia | +62 852-9211-3575 | apidmedicpeople@gmail.com

PROFESSIONAL SUMMARY

Results-driven Logistics with 12+ years of progressive experience in pharmaceutical manufacturing and supply chain operations within the Kalbe Group. Proven expertise in end-to-end warehouse management, raw material logistics, finished goods distribution, and GMP compliance. Demonstrated ability to lead warehouse renovation projects (DQ, URS, IQ, OQ, PQ), implement shuttle racking systems, and deploy AHU for controlled storage environments. Combines deep pharmaceutical industry knowledge with advanced data analytics skills using Tableau, AppSheet, and Excel to drive operational efficiency and data-driven decision making. Holds Apothecary (S.Farm., Apt.) qualification — providing unique regulatory and quality advantage in pharmaceutical logistics roles.

CORE COMPETENCIES & SKILLS

Supply Chain & Logistics: End-to-End Logistics Management, Warehouse Management, Inventory Control, Distribution Planning, 3PL Coordination, Raw Material Supply, Finished Goods Management

Warehouse Qualification: Design Qualification (DQ), User Requirement Specification (URS), Installation Qualification (IQ), Operational Qualification (OQ), Performance Qualification (PQ), Temperature Mapping

Warehouse Systems: Shuttle Racking System, Pallet Racking, FIFO Stock Rotation, AHU (Air Handling Unit), Controlled Storage Conditions, Cold Chain, Storage Compliance

Compliance & Quality: GMP (Good Manufacturing Practice), SOP Development, Internal Audit, BPOM Compliance, Pharmaceutical Regulations, TPM (Total Productive Maintenance)

Data & Analytics: Microsoft Excel Advanced (Pivot Table, VLOOKUP, Dashboard, Data Cleaning), Tableau Dashboard, AppSheet (Workflow Automation), OEE Monitoring, KPI Reporting

Leadership: Team Management, Manpower Planning, Performance Coaching, Cross-functional Coordination, Training & Development

Technology & ERP: Oracle ERP, Werum System, EWS (Electronic Weighing System), Microsoft Office Suite, Canva

PROFESSIONAL EXPERIENCE

Logistics Supervisor

PT. Finusol Prima Farma Internasional (Kalbe Group) | May 2025 – Present | Bogor, Indonesia

- Lead daily logistics and weighing operations, ensuring uninterrupted raw material supply to production lines across all shifts
- Analyze warehouse capacity data and implement storage optimization strategies to maximize space utilization
- Monitor and control raw material distribution flow, proactively preventing production delays and line stoppages
- Enforce GMP compliance across all logistics and warehouse activities, ensuring zero deviations during audits
- Drive workflow efficiency improvements through KPI dashboard monitoring and continuous improvement initiatives

Logistics Supply & Weighing Supervisor

PT. Hexpharm Jaya (Kalbe Group) | Jan 2025 – Apr 2025 | Bogor, Indonesia

- Supervised weighing operations for active pharmaceutical ingredients (API) and excipients, maintaining batch accuracy and traceability
- Ensured continuous and reliable material supply to multiple production lines, achieving minimal downtime
- Improved process control procedures, reducing line stoppages and contributing to improved OEE performance
- Led team development programs and performance improvement initiatives

Logistics – Secondary Packaging & Finished Goods Supervisor

PT. Hexpharm Jaya (Kalbe Group) | 2022 – 2024 | Bogor, Indonesia

- Managed finished goods distribution to 20+ branch offices and external partners, maintaining 98%+ on-time delivery rate
- Analyzed warehouse occupancy data and redesigned storage layout, improving space utilization by approximately 20%
- Developed and implemented digital monitoring systems for real-time warehouse operations visibility
- Led TPM (Total Productive Maintenance) Office Pillar implementation as Pillar Leader, establishing sustainable lean practices
- Ensured GMP-compliant, safe, and efficient warehouse processes aligned with BPOM regulations

Production Supervisor

PT. Hexpharm Jaya (Kalbe Group) | 2013 – 2021 | Bogor, Indonesia

- Led solid dosage production operations, managing a team of 15–20 operators across 3 shifts
- Monitored and improved OEE metrics through systematic data analysis, achieving consistent production efficiency targets
- Developed and maintained comprehensive SOPs for GMP and TPM compliance across tablet production lines
- Increased tableting line capacity through process optimization and equipment performance improvement
- Managed system transition from Werum to EWS (electronic weighing system), coordinating training and data migration
- Conducted manpower planning, performance appraisals, and team capability development programs

KEY PROJECTS & ACHIEVEMENTS

Finished Goods Warehouse Renovation & Full Qualification (DQ – URS – IQ – OQ – PQ)

Led end-to-end renovation and qualification of the Finished Goods Warehouse to achieve GMP-compliant controlled storage conditions for pharmaceutical products. Scope included:

- Design Qualification (DQ): Developed DQ documentation to verify warehouse layout, racking configuration, and HVAC system design met GMP and product storage specifications
- User Requirement Specification (URS): Authored comprehensive URS defining functional and compliance requirements including storage capacity, temperature/humidity control (15–25°C, RH ≤60%), and racking load specifications
- Racking System — Shuttle System: Evaluated and selected semi-automated Shuttle Racking System to maximize storage density, enforce FIFO stock rotation, and reduce forklift dependency — significantly increasing pallet capacity within existing footprint
- AHU Installation for Storage Compliance: Coordinated installation of Air Handling Unit (AHU) to maintain controlled storage conditions, ensuring compliance with GMP and product registration (BPOM) requirements — protecting product quality and shelf life
- Performance Qualification (PQ): Executed PQ protocol including temperature mapping studies across warehouse zones, documented evidence of compliant storage conditions under real operational loads, and obtained approval for Finished Goods storage operations

Other Key Achievements

- Developed OEE monitoring dashboard using Excel and Tableau — enabled real-time production efficiency tracking, reducing reporting time by 60%
- Built warehouse digitalization system using AppSheet — eliminated manual paper-based processes and improved inventory accuracy
- Created MH & MCH calculation tool for production planning — reduced material calculation errors and improved batch scheduling accuracy
- Designed Tableau dashboard for finished goods distribution flow — provided management with real-time logistics visibility
- Led TPM AM & Office Pillar implementation — established sustainable improvement culture across warehouse and production teams
- Supported ERP system transition from Werum to EWS — coordinated user training and ensured zero data loss during migration

EDUCATION

Apothecary Program (Profesi Apoteker)

Universitas Ahmad Dahlan, Yogyakarta / 2012 – 2013

Bachelor of Pharmacy / Sarjana Farmasi (S.Farm.)

Universitas Ahmad Dahlan, Yogyakarta / 2007 – 2012
