PROFILE

A registered pharmacist from Universitas Surabaya (GPA 3.81), certified in GMP and CPOB. Gained hands-on internship experience at PT Interbat, working with Critical Material Attributes (CMA) and Critical Process Parameters (CPP), regulatory compliance verification, and gap analysis against international quality standards — building solid understanding of raw material and packaging quality requirements under CPOB. Further strengthened by experience as a Teaching Assistant for Solid Dosage Form Manufacturing, and leadership roles including Publication Staff at the Faculty of Pharmacy's Student Representative Council (DPM) and a 100% Outstanding Achievement Scholarship in Sports and Arts, reflecting discipline and precision under pressure. Combined with broad internship exposure across the pharmaceutical distribution, primary healthcare, and hospital sectors, this background provides a detail-oriented foundation for a Quality Control Supervisor.

EDUCATION

Universitas Surabaya

2025 – 2026

Apothecary, Faculty of Pharmacy – GPA: 3.81/4.00

- Relevant Courses: Pharmaceutical Quality Management, Good Manufacturing Practices (GMP/CPOB), Industrial Pharmacy, Solid Dosage Form Manufacturing, Liquid & Semisolid Dosage Form Manufacturing.

Universitas Surabaya

2021 – 2025

Bachelor of Pharmacy, Faculty of Pharmacy – GPA: 3.65/4.00

- Relevant Courses: Industrial Pharmacy, Pharmaceutical Dosage Form Design, Drug Delivery Technology, Solid Dosage Form Manufacturing, Liquid and Semisolid Dosage Form Manufacturing.

WORKING EXPERIENCE

Clinical Pharmacist Intern | Bethesda Hospital, Yogyakarta, Central Java

April – May 2026

- Conducted medication reconciliation and prescription screening for inpatients, covering drug interactions, dosage appropriateness, and therapy duplication
- Monitored drug therapy for 3 inpatients with liver cirrhosis, chronic kidney disease (CKD), and post-URS (Ureterorenoscopy) surgery over a 1-week period, including dose adjustment considerations
- Completed a case-based exercise calculating chemotherapy dosage for a cancer patient, alongside observation of IV admixture and cytostatic drug preparation procedures.

Apothecary Intern | PT Interbat, Sidoarjo, East Java

February – March 2026

- Established Critical Material Attributes (CMA) for raw materials and packaging materials across suppository, syrup, tablet, and film-coated tablet products, supported by risk (severity) analysis and justification — directly relevant to material identification and specification control in a sampling environment
- Conducted a gap analysis comparing Interbat's Ongoing Process Verification (OPV) practices against five international quality standards (USP-NF, ISPE, CPOB 2024, FDA, EU GMP Annex 15), identifying improvement opportunities to strengthen compliance with Good Laboratory Practice (GLP) and CPOB requirements
- Reviewed and interpreted regulatory differences between BPOM Regulation No. 27 of 2025 and the Decree of the Acting Director of Drug, Narcotics, Psychotropics, and Precursor Production Supervision of BPOM No. HK.02.02.33.12.25.72 of 2025, ensuring internal procedures remained aligned with current government regulations
- Developed equipment trains for 118 non-beta-lactam solid dosage and powder products, strengthening documentation accuracy and material/equipment traceability — a core principle in maintaining consistent status identification between physical and system records
- Supervised In-Process Control (IPC) inspectors during production activities, ensuring inspection and testing results were accurately recorded and properly maintained as part of quality documentation practices
- Performed risk (severity) analysis and justification for critical quality parameters, applying a structured approach comparable to Corrective Action Preventive Action (CAPA) practices used in addressing non-conformances and audit findings.

Clinical Pharmacist Intern | VIVA Apotek, Surabaya, East Java

December 2025 – January 2026

- Provided drug information and self-medication services to 10+ patients each day
- Conducted the drug side effects monitoring, drug therapy monitoring, and counseling each of 5 patients
- Create a leaflet on osteoporosis prevention, covering risk factors, causes, effects, and prevention methods

Apothecary Intern | Puskesmas Tenggilis, Surabaya, East Java

November – December 2025

- Prepared medications and provided Information, Education, and Communication (KIE) services to outpatients, including specific drug information (PIO) for special dosage forms such as suppositories, oral nystatin, and eye ointments
- Participated in Posyandu Keluarga activities, including monitoring infant height and weight and measuring maternal blood pressure, along with providing basic health education on hypertension management and healthy lifestyle habits
- Learned the medicine ordering and procurement procedures applicable at the primary healthcare level
- Trained in completing incident reporting forms for potential injury events (near-miss/adverse incidents) at the health center, including the appropriate follow-up handling procedures — reflecting early exposure to incident documentation and corrective action principles.

Apothecary Intern | PT Enseval Putera Megatrading, Sidoarjo, East Java

October – November 2025

- Verified sales invoices and customer specimen documents (including authorized signatures) to ensure completeness and compliance with distribution documentation requirements
- Cross-checked documentation accuracy as part of the quality control process in pharmaceutical distribution, reinforcing attention to detail in document verification

- Gained applied knowledge of Good Distribution Practices (GDP/CDOB) through daily briefing sessions covering distribution standards, documentation control, and regulatory compliance in the pharmaceutical supply chain.

Tutor Assistant Lecturer of Sterile Dosage Form Technology | Universitas Surabaya

January – June 2025

- Supervise 40 students in a 2-credit-hour (5-hour) lab course on a weekly basis.
- Assist and monitor the lab sessions and ensure compliance with safety procedures.
- Assist the instructor in compiling the grades of 40 students, which consist of lab reports and assignments

ORGANIZATIONAL EXPERIENCE

Faculty of Pharmacy Student Council (DPM) | Universitas Surabaya

2021 – 2023

Publication Staff

- Disseminated official announcements from the Dean's Office accurately and on time, covering academic updates, administrative matters, and faculty events
- Developed clear, structured content across multiple platforms (Instagram, LINE, Telegram), including academic tutorials and procedural guidance
- Maintained consistent responsiveness in addressing student inquiries, reflecting reliability and a service-oriented mindset.

VOLUNTEER EXPERIENCE

Audit Series | Universitas Surabaya

November 2021

Public Relations Division

- Coordinated with 2 external speakers for a training session on auditing proposals and activity accountability reports (LPJ)
- Evaluated 20 participants' understanding of proper auditing procedures for proposals and accountability reports, ensuring alignment with established standards
- Collected structured feedback from participants to support continuous improvement of future program quality.

Study Excursie - Herbal Medicine Hero from the Traditional Culture | Universitas Surabaya

August 2022

Steering of Commities (SC)

- Defined program objectives together with the Executive Board (BPH), centered on introducing traditional herbal potential and strengthening knowledge of traditional pharmacy
- Oversaw program preparation and execution involving 20 students, ensuring implementation stayed aligned with the intended goals
- Evaluated program outcomes and compiled recommendations to guide the planning of future initiatives.

KRS (Study Plan Card) Online Tutorial | Universitas Surabaya

December 2022

Material Division Coordinator

- Structured tutorial content on Study Plan Card (KRS) procedures in line with academic regulations, presented to 80 participants
- Delegated tasks across 4 division members, covering slide preparation and anticipated Q&A materials
- Gathered participant feedback through structured forms to refine the clarity and quality of tutorial content.

CERTIFICATIONS

- Certificate of Good Manufacturing Practice (GMP) in Pharmaceutical Industry – Teman Lab
- Certificate of Cara Pembuatan Obat yang Baik (CPOB) – Makin Ahli
- English Score Core Skills CEFR B2 – British Council

SKILL

- Proficiency in Microsoft Office (Word, Excel, PowerPoint)
- Effective communication
- Time management
- Teamwork
