My Profile

Fresh Graduate Pharmacist with professional internship experience in pharmaceutical manufacturing and Quality Control, with exposure to GMP/CPOB, QMS, quality documentation, OOS/OOT review, and Quality Risk Management. Experienced in reviewing quality data and supporting quality-related assessments in a regulated manufacturing environment. Familiar with deviation, CAPA, change control, qualification, validation, and GDP/ALCOA+ documentation practices. Detail-oriented, analytical, adaptable, and interested in developing a career in Quality Assurance and pharmaceutical quality management.

Education

Universitas Islam Bandung - Bachelor of Pharmacy (GPA : 3.72 / 4.00) **2021 - 2025**

- Relevant Coursework: Pharmaceutical Analysis, Analytical Method Development & Validation, Qualitative & Quantitative Analysis, Physicochemical Analysis, Pharmaceutical Microbiology

Universitas Padjadjaran - Apothecary Profession (GPA : 3.75 / 4.00) **2025 - 2026**

- Relevant Coursework: Pharmaceutical Industry, Quality Control & Quality Assurance, Pharmaceutical Management & Regulation

Experience

PT. Bina San Prima **April 2026**

Pharmacist Intern – Pharmaceutical Distribution

- Gained practical experience in pharmaceutical distribution and CDOB, including proper storage, handling, and distribution of pharmaceutical products.
- Assisted in reviewing invoices and Surat Pesanan (SP) for psychotropics, OOT, and pharmaceutical precursors.
- Gained exposure to warehouse and expedition operations, including product preparation and handling for delivery.

PT. Medika Antapani Bandung **March 2026**

Pharmacist Intern – Community Pharmacy

- Gained experience in clinical and community pharmacy practice across Klinik Pratama Medika Antapani, Klinik Utama Medika Antapani, and Apotek Medika Antapani.
- Performed prescription screening, dispensing, patient counseling, Drug Information Services (DIS), and self-medication services.
- Assisted with daily pharmacy operations, including upselling and cross-selling, while maintaining appropriate patient care.

PT. Fonko International Pharmaceutical **January 2026 - February 2026**

Quality Control Internship

- Gained hands-on exposure to Quality Control operations and GMP/CPOB implementation in a pharmaceutical manufacturing environment.
- Assisted in reviewing OOS/OOT results by evaluating analytical data, identifying potential root causes, and conducting literature reviews.
- Performed weekly analysis of stability chamber temperature data, identified out-of-specification results, and prepared monitoring reports.
- Conducted a risk assessment of laboratory glassware shelf life, including potential risks and their impact on laboratory quality practices.
- Developed an understanding of critical utilities, including HVAC and water systems, and their role in product quality and manufacturing compliance.
- Observed pharmaceutical manufacturing processes, including production workflows, quality controls, and documentation practices.
- Observed raw material sampling procedures, including the handling and sampling of cytotoxic APIs

- Performed clinical pharmacy services, including prescription review, medication reconciliation, patient counseling, and drug information services.
- Conducted medication therapy monitoring by evaluating patients' clinical conditions, laboratory results, and medication regimens under pharmacist supervision.
- Participated in multidisciplinary ward rounds and assisted in identifying potential drug-related problems to support safe and effective medication use.

Universitas Islam Bandung

February 2025 - June 2025

Laboratory Assistant – Organic Chemistry

- Served as a Laboratory Assistant, taught and guided 120+ undergraduate students, twice a week, in laboratory activities including compound purification, compound identification, and other organic chemistry experiments.
- Supported the preparation of laboratory materials and ensured adherence to safety and accuracy standards during practical sessions.
- Facilitated discussions and Q&A sessions with students regarding the experiments conducted.

Undergraduate Research Project

Cyclic Hexapeptide Analog Synthesis as an Antimalarial Candidate

2024 - 2025

- Conducted research on the development of a peptide-based antimalarial candidate using amino acid building blocks.
- Synthesized a cyclic hexapeptide analog through SPPS and LPPS, followed by cyclization and deprotection, characterized the synthesized compound using mass spectrometry
- Successfully obtained the target cyclic hexapeptide analog based on the synthesis and characterization results.

Organizational Experience / Volunteer

Korps Protokoler Mahasiswa Unisba

2022 - 2024

Assisted in organizing academic and ceremonial events, coordinating protocols, and supporting official university activities, while developing skills in public communication, teamwork, and event management.

Kuliah Kerja Nyata (KKN) - Farmasi Universitas Islam Bandung

July 2024

- Delivered health education to the community, including DAGUSIBU (Dapatkan, Gunakan, Simpan, dan Buang Obat), rational drug use, and self-medication awareness.
- Conducted public health campaigns on stunting prevention, hygiene (PHBS), and handwashing practices.
- Collaborated with local health cadres and community members to support sustainable health programs.

Health Education on Immunization – Cibaduyut Kidul Public Health Center

January 2025

- Delivered health education sessions on the importance of childhood immunization to the local community.
- Collaborated with healthcare staff in preparing materials and supporting the implementation of the program.
- Promoted preventive healthcare awareness through interactive discussion and educational media.

Certifications & Training

Good Laboratory Practice - Makin Ahli

August 2026

Gained an understanding of GLP principles, laboratory organization, facilities and equipment, SOP, documentation, sample handling, and reporting.

Skills

-
- Technical Skills: GMP/CPOB, GLP, OOS/OOT review, risk assessment, laboratory documentation, pharmaceutical manufacturing, regulatory compliance, CDOB
 - Professional: Analytical thinking, attention to detail, problem-solving, teamwork, adaptability, time management
 - Communication & Leadership: Communication, coordination, public speaking, health education, patient counseling, event coordination
 - Software: Microsoft Office (Word, Excel, PowerPoint), Kingsoft Office, basic design and documentation tools
