SUMMARY

Aspiring Pharmacist with strong interests in Product Development, Business Development, Quality Control, and Quality Assurance in the pharmaceutical industry. I am detail-oriented and adaptable, thrive in fast-paced environments, and collaborate effectively to ensure efficient workflows.

EXPERIENCES

PT CKD OTTO PHARMACEUTICALS, Central Cikarang

Quality Control Intern

July 2025 - August 2025

- Created analysis method verification document for active ingredient assay.
- Developed specification, analytical method, report, and worksheet for new drug product (referencing USP and in-house tests) to accomplish the availability of required documents before the production target timeline.
- Prepared CoA comparisons between PT CKD OTTO Pharmaceuticals products and innovators; Prepared manual CoAs from testing results.
- Compiled excipient specification comparisons between master CoA and compendia.
- Revised specifications, analytical methods, and work instructions for raw materials/products to comply with the latest regulations.
- Released packaging materials after QC approval; Prepared and compiled packaging material test documents to ensure the completeness of the documents.
- Ensured the availability of materials for trial production.

Badan Riset dan Inovasi Nasional RI (BRIN RI), Serpong

Undergraduate Final Research Project

March 2024 - August 2024

- Conducted research and development on formulations for orally dissolving films from the extract of ketepeng cina leaves.
- Evaluated project progress with supervisors and proposed improvement solutions along with the trial process to optimize outcomes.
- Coordinated with supervisors for the material procurement, purchasing reports, and film properties analysis during the development.
- Ensured material availability and verified Certificates of Analysis (CoA) of the materials.
- Managed project timelines to achieve targets.
- Designed secondary packaging for film dosage form.

Universitas Islam Negeri Jakarta, South Tangerang

Laboratory Assistant of Liquid and Semi-solid Formulation Technology Practicum

September 2023 - December 2023

- Coordinated with the lecturer for preparing lab equipments.
- Supervised and assessed the students' OSCE model exam.
- Guided the students based on the learning module and ensured compliance with the laboratory procedures.
