## Pengalaman Kerja

---

### Quality Control

PT Paxar Indonesia (Avery Dennison SG Indonesia)

Mar – Now

- Developed, updated, and maintained Work Instructions (WI) and SOP documentation to ensure process standardization and compliance.
- Conducted process audits and production inspections to ensure adherence to quality standards and operational procedures.
- Managed Internal Complaint Reports (ICR) and Non-Conformance Reports (NCR), including investigation, follow-up, and corrective action monitoring.
- Successfully reduced potential reject defects by 65% through proactive monitoring and preventive quality actions before customer complaints occurred.
- Prevented incorrect material usage affecting approximately 21,000 pcs prior to production, minimizing production risk and material losses.
- Handled and completed control/update of 4 Work Instructions (WI) within one month to support operational improvement and process consistency.
- Performed Root Cause Analysis (RCA) and implemented corrective and preventive actions (CAPA) for production issues and customer complaints for report to manager.
- Delivered quality awareness training and socialization regarding process findings, standard procedures, and production quality requirements.
- Coordinated with Production and related departments to ensure timely closure of quality findings and continuous improvement implementation.

---
