WORK EXPERIENCES

Rumah Sakit Kebonjati, Bandung

AUGUST 2023 – NOW

Medical Procurement

- Oversee the end-to-end procurement process for pharmaceuticals and medical supplies, ensuring alignment with hospital requirements and approved formulary guidelines.
- Liaise with vendors to build productive partnerships, negotiate competitive pricing and contractual agreements, and monitor delivery performance to maintain supply continuity.
- Ensure all procurement operations adhere to applicable healthcare regulations, Good Distribution Practice (GDP) standards, and established hospital procedures.
- Prepare demand projections and purchasing plans by analyzing utilization data, inventory movement, and service needs.
- Perform vendor assessments, pricing comparisons, and financial evaluations to enhance cost efficiency without compromising quality or product availability.
- Work closely with pharmacy, clinical, and finance teams to synchronize purchasing strategies with budget planning and operational targets.
- Contribute to formulary review and medication standardization efforts in collaboration with the Pharmacy and Therapeutics Committee.

PT. Tropica Mas Pharmaceuticals Cianjur

NOVEMBER 2022 – APRIL 2023

Staff Research & Development (Analytical Development)

- Developed and established analytical testing procedures for raw materials using validated laboratory instruments (e.g., HPLC, UV-Vis spectrophotometry, and other compendial methods).
- Performed method validation and verification in accordance with regulatory and pharmacopoeial requirements.
- Conducted analytical testing of raw materials, intermediates, and finished products to ensure compliance with quality standards.
- Analyzed and interpreted laboratory data, ensuring accuracy, reliability, and data integrity.
- Prepared validation protocols and reports, standard operating procedures (SOPs), and technical documentation.
- Collaborated with Quality Control and Production teams to support product development and process improvement.
- Ensured laboratory activities complied with Good Manufacturing Practices (GMP) and regulatory guidelines.
