Experience

Packaging Development Assistant Specialist

02/25 - 01/26

PT Dexa Medica

- Provided technical support for Dexa Group manufacturing sites including Dexa Medica, Beta Pharmacon, and Anugrah Amartha Global.
- Supported facility improvements such as new packaging machines, change parts, and new packaging lines, including technical drawing review and SAT/FAT qualification.
- Executed alternative source and cost reduction packaging projects through lab trials, risk assessment, optimization, stability trials, and packaging material release.
- Supported second brand and import product registration by preparing validation protocols, batch records, packaging formulas, and executing process validation.
- Managed packaging-related change control as opinion giver or change control requestor.
- Prepared batch records for trial and commercial production, validation protocols and reports, and testing methods for packaging materials.
- Coordinated cross-functional teams (PMO, FD, AD, AM) in product transfer from development to commercial scale.
- Prepared and updated Working Instructions (WI) and Standard Operating Procedures (SOP).

Packaging Development Specialist

12/2023 - 02/2025

PT Corsa Industries

- Supervised one packaging development staff and managed daily task assignments.
- Ensured packaging compliance with BPOM regulations (Perka BPOM No. 24/2017, No. 11/2020, and Kepka BPOM No. 279/2024).
- Executed $\pm$ 80 packaging trials for new products covering primary, secondary, and tertiary packaging.
- Collaborated with QA, QC, and Marketing teams on packaging briefs, artwork development, and proof print approval.
- Created $\pm$ 80 new packaging design contents and revised $\pm$ 30 existing designs including leaflets, brochures, and barcodes.
- Performed packaging supplier qualification and audits and coordinated with suppliers for development samples.
- Conducted Proof Print on the Spot (PPoS) to ensure artwork accuracy prior to mass production.
