PROFESSIONAL SUMMARY

Pharmacist graduated from Jember University with a GPA of 3.93. Highly enthusiastic about clinical pharmacy services, with professional experience in a community pharmacy and practical training in hospitals, a public health centre, and a pharmaceutical distributor. Responsible and knowledgeable in clinical pharmacy services, including dispensing, patient consultation, self-medication, drug information services, and pharmaceutical management. Patient-oriented professional with strong communication and leadership skills. Committed to continuously developing professional skills and making a meaningful contribution to pharmaceutical services.

WORK EXPERIENCE

APOTEK H+, Jakarta – Pharmacist in Charge

October 2025 – Present

- Responsible for overall pharmaceutical management, including the planning, selection, and inventory control of medicines.
- Responsible for all pharmaceutical service processes at the pharmacy, ensuring that all clinical services and dispensing activities are carried out in accordance with applicable pharmacy regulations.
- Applied proactive problem-solving to address clinical inquiries and operational challenges efficiently.
- Responsible for human resource management and for developing and implementing comprehensive SOPs and technical documentation for pharmacy operations.
- Resolved complex inventory discrepancies and supply chain challenges by applying a systematic root cause analysis approach to maintain optimal inventory levels.
- Implemented a comprehensive regulatory compliance framework to monitor pharmacy operations, ensuring that all documentation and storage practices comply with applicable BPOM requirements.

RSUD dr. Iskak Tulungagung, Tulungagung – Pharmacist Professional Practice Program (PKPA)

October – November 2024 (2 months)

- Developed professional competencies in pharmaceutical management and pharmacy services within a hospital setting.
- Developed a comprehensive understanding of prescription review, medication dispensing, self-medication and patient counseling, adverse drug reaction monitoring, drug therapy monitoring, medication reconciliation, and medication reconstitution.
- Strengthened the ability to remain calm and work efficiently in a demanding and high-pressure hospital environment.

Kimia Farma 62, Jember – Pharmacist Professional Practice Program (PKPA)

September 2024 (1 month)

- Gained practical knowledge and experience in pharmaceutical management, from planning and selection to medicine inventory control.

- Learned pharmacy administration procedures, including preparing purchase orders, invoices, and medicine receipt documents. Developed strong skills in accurate prescription screening, medication dispensing, self-medication services, and patient counseling.

PT. Ferron Par Pharmaceutical, Cikarang – Pharmacist Professional Practice Internship

July – August 2024 (1 month)

- Participated in the qualification process for a new sterile production line (Water for Injection system).
- Developed standard operating and maintenance procedures for the Water for Injection system to improve operational effectiveness.
- Performed pH, conductivity, Total Organic Carbon (TOC), and nitrate analyses of water samples from the Water for Injection system during the Performance Qualification (PQ) process.
- Gained an understanding of the drug manufacturing process and quality assurance, from raw material selection through product distribution.

RSUP Sardjito, Tawangmangu

July 2024

Observed and studied the manufacturing process of traditional medicines, from the selection of quality raw materials and product evaluation to distribution to patients. Provided pharmaceutical services, including patient counseling and monitoring of adverse effects associated with traditional medicine use.

Public Health Centre

July 2024

Gained experience in medicine management at a public health centre. Learned the medicine ordering process, prescription screening, self-medication services, patient counseling, and provision of drug information.

Bioavailability and Pharmacokinetics Laboratory Assistant

August – December 2023 (5 months)

- Prepared laboratory equipment and experimental animals for practical sessions.
- Guided pharmacy students in conducting practical sessions correctly and safely.
- Performed post-practical laboratory cleaning, equipment sterilization, and proper disposal of laboratory waste.
- Collaborated with other laboratory assistants in weekly evaluations and planning of upcoming laboratory sessions.
- Reviewed and assessed students' practical work fairly and objectively.
- Proficient in using laboratory instruments for substance identification, separation, and quantitative analysis, including HPLC, UV-Vis Spectrophotometry, etc.

Biotechnology Laboratory Assistant

February – June 2023 (5 months)

- Prepared laboratory equipment, culture media (e.g., Nutrient Agar, PDA), and biological samples, and performed equipment sterilization using autoclaves and ovens.
- Guided pharmacy students in aseptic techniques, isolation and identification, and DNA amplification of plants and microorganisms.
- Ensured laboratory and practical safety as well as compliance with laboratory procedures.
- Conduct post-lab cleanup, sterilize equipment, and properly dispose of lab waste
- Collaborate with other lab assistants on weekly evaluations and planning for upcoming lab session
- Review and evaluate student performance fairly and objectively
- Proficient in using laboratory instruments for substance identification, separation, and quantitative analysis, including HPLC, UV-Vis Spectrophotometry, etc.
