PROFILE

Fresh Graduate Pharmacist from Universitas Padjadjaran with practical experience in pharmaceutical manufacturing and healthcare settings. During an internship in a pharmaceutical manufacturing company, gained exposure to GMP principles, Cleaning Validation, Process Validation, and Product Quality Review (PQR) activities, including data entry and product quality evaluation. Detail-oriented and organized, with a strong interest in pharmaceutical quality systems and document control, as well as the ability to support accurate documentation and cross-functional collaboration.

INTERNSHIP EXPERIENCE

RSUP Dr. Hasan Sadikin - Kota Bandung (PKPA)

March 2026 - April 2026

- Performed pharmacy practice in both pharmaceutical management and clinical pharmacy services.
- Assisted in medication management processes, including receiving, storage, inventory control, and distribution of pharmaceutical products in accordance with hospital standards.
- Participated in medication dispensing by ensuring the accuracy of prescriptions, dosage, labeling, and patient-specific medication preparation.
- Conducted medication reconciliation to identify and prevent discrepancies in patients' medication histories during transitions of care

PT. Solas Langgeng Sejahtera - Cimareme (PKPA)

January 2026 - February 2026

- Assisted in Cleaning Validation and Process Validation activities to ensure manufacturing processes consistently met quality and GMP requirements.
- Performed data entry and trend analysis for Product Quality Review (PQR) to evaluate product quality consistency and manufacturing performance.
- Categorized and evaluated product complaints according to quality management procedures to facilitate investigation and corrective actions.
- Developed exposure to quality systems, GMP implementation, validation documentation, and quality-related data management.

Apotek Kimia Farma - Sulanjana (PKPA)

December 2025

- Provided pharmaceutical care through prescription dispensing, medication counseling, and drug information services.
- Assisted patients with self-medication consultations and appropriate medicine selection.
- Supported inventory management, including medication storage, stock control, and expiry monitoring.

Dinas Kesehatan Kota Bandung & UPTD Puskesmas Derwati (PKPA)

November 2025

- Participated in pharmaceutical services at the Community Health Center, including mobile health services (Puskesmas Keliling).
- Supported the management of pharmaceutical supplies, including procurement flow, storage, inventory recording, and stock management.
- Assisted in pharmacy reporting and information systems, including LPLPO, SIPNAP, SIHA, and SITB, to support inventory monitoring and public health programs.

WORK EXPERIENCE

February 2025 - July 2025

Pharmacology and Community Pharmacy Laboratory

Teaching Assistant - Pharmacotherapy Practicum (Endocrine and Cardiovascular Disorders)

- Guided 120+ pharmacy students in analyzing disease pathophysiology, therapeutic approaches, and treatment outcomes through systematic evaluation of clinical information.
- Facilitated practical sessions in interpreting clinical data and identifying patterns related to disease and treatment response
