

ANNISA MIFTA SAFITRI

0895-3236-10102 | miftaannisa06@gmail.com

Depok, Jawa Barat

Licensed Pharmacist with experience in cosmetic formulation, quality evaluation, and stability testing. Experienced as Research and Development (R&D Staff), developing personal care formulation, improving product performance, and regulatory documentation. Detail oriented, adaptable, and passionate about creating effective and innovative products.

PROFESSIONAL EXPERIENCES

Research and Development (R&D) Staff <i>PT Shiba Sukses Sejahtera</i>	March 2026 - Now
- Developed and optimized personal care formulations (creams, serums, lotions) through formulation trials, including raw material selection, weighing, and mixing processes. - Evaluated product quality and stability through physical testing pH, viscosity, and organoleptic observation during trial development. - Research and assessed raw materials and active ingredients to create effective and market-relevant formulation. - Prepared product documentation and supported regulatory submission and BPOM registration while collaborating with cross-functional team (marketing, production, quality control) to support product development and commercialization	
Pharmacy Assistant <i>RSU Andhika</i>	Mei 2023 – March 2026
- Assisted in sterile and non-sterile pharmaceutical preparation, ensuring adherence to protocols and quality standards. - Applied aseptic techniques in dispensing and handling sterile products in compliance with SOP. - Maintained accurate documentation and supported quality control through strict adherence to safety procedures.	

INTERNSHIP EXPERIENCES

Pharmaceutical Industry <i>PT Bagfarmapol, Cipinang, East Jakarta</i>	Feb – March - 2025
- Participated in small-scale tablet and cosmetic formulation (raw and active materials, mixing, compression, and evaluation). - Conducted physical and microbiological testing to assess formulation quality and stability. - Prepared structured formulation and evaluation reports.	
Hospital Pharmacy <i>RSUD Cibinong, Bogor, West Java</i>	Des 2025 – Jan 2026
- Applied aseptic techniques during sterile product preparation using Biosafety Cabinet (BSC) - Followed SOP related to medication handling and infection control
