PROJECT EXPERIENCE

1. Formulation and Evaluation of a Porang Tuber Starch–Based Non-Carcinogenic Sunscreen

Research Grant Awardee – Ministry of Education, Culture, Research, and Technology of Indonesia (2023). Conducted a team-based research project under the Student Creativity Program – Exact Research (PKM-RE) titled Diversification of Porang Tuber Starch (*Amorphophallus oncophyllus*) as a Non-Carcinogenic Sunscreen.

Roles in the project :

- Initiated and contributed to the development of a sunscreen formulation product
- Contributed to research resulting in a patent (ID: IDS000007400) and peer-reviewed publication
- Participated in product introduction through exhibitions, social media, and public outreach
- Gained exposure to early-stage product commercialization and public engagement

2. Bachelor’s Thesis: Porang Starch–Based Sunscreen Formulation with Titanium Dioxide

- Developed the study as a continuation of prior research on porang tuber starch as a natural sunscreen active ingredient.
- Developed sunscreen formulation combining porang starch and titanium dioxide
- Evaluated product performance (SPF and physical properties)
- Published in *Clinical and Pharmaceutical Sciences Journal*
