ABOUT ME

I graduated from the Apothecary Program of University Indonesia with summa cumlaude honors and earning my Bachelor of Pharmacy degree in 3.5 years as the top graduate. I have hands-on experience at PT Global Onkolab Farma in product quality management, where I contributed to the preparation of product quality reviews and the handling of product compliance. I have significant experience in the cosmetics industry, particularly in Research and Development (R&D), with direct involvement in the formulation of cosmetic products and quality evaluation. These experiences have strengthened my competencies in product formulation and development. My undergraduate thesis focused on pharmaceutical technology, specifically on the development of Solid Lipid Nanoparticle (SLN) based gel formulations utilizing natural compounds.

EDUCATION

University of Indonesia

Apothecary Student (GPA: 3.95/4.00)

Jan 2025-Present
