About Me

Associate Degree graduate in Informatics Engineering with hands-on experience as a Frontend, Backend, and Fullstack Web Developer through freelance projects, internships, and vocational training. Experienced in developing end-to-end web applications, including user interface development, RESTful API implementation, and database integration. Strong team player with excellent problem-solving skills and the ability to quickly learn and adapt to new technologies.

Work Experience

PT Vodjo Teknologi Indonesia - Frontend Web Developer (Freelance) January 2025 – February 2026

- Developed responsive admin module web interfaces for dynamic web platforms using Vue.js and JavaScript.
- Integrated RESTful APIs efficiently through close collaboration with UI/UX designers and backend engineers to ensure design alignment and functionality.

PT Bejana Investidata Globalindo - Fullstack Web Developer (Internship) July 2025 – October 2025

- Built integrated full-stack systems using the TypeScript ecosystem, Next.js (frontend), and Express.js (backend).
- Developed RESTful APIs and PostgreSQL database architecture, and collaborated cross-functionally to maintain application stability during the internship period.

PT Thredio Engineering - Frontend Web Developer (Internship) January 2023 – April 2023

- Built interactive UI components for internal data systems using the Vue.js ecosystem.
- Collaborated with backend engineers and UI/UX designers to ensure functional and accurate data integration on the frontend side.

Education

Politeknik Negeri Bandung D3 Informatics Engineering	2023 – 2026 (Expected Graduation: August 2026)
SMK Negeri 1 Cimahi Software Engineering	June 2020 – May 2023

Skill

Next.js, React, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Express.js, Python, Java Springboot, Kotlin, Laravel, PostgreSQL, RESTful API Design, Git, Docker, Fedora Linux, Figma, Vercel, GCP
