July 23rd, 2026

Dear Valued Customer,

We value the partnership we have built with you and appreciate the trust you place in us as your supplier. It is with that commitment that we are writing to inform you of an upcoming adjustment to our pricing.

Effective for all orders shipping on or after 1st September 2026, and as contracts allow, Colorcon will increase prices to compensate for the extraordinary escalation of costs associated with energy, materials and logistics.

All Colorcon products will increase 5%, excluding LOTTE and ASHA distributed products.

While Colorcon continues to drive operational excellence to minimize the impact of cost pressures, our priority remains the commitment to providing a reliable, uninterrupted supply of high-quality products and services to meet our customers' needs in a challenging and uncertain environment. We are actively investing in the capabilities that matter most to you:

- Strengthening our Business Continuity Plan to ensure uninterrupted operations under challenging conditions.
- Securing continuous availability and supply of key materials to reduce exposure to market volatility.
- Expanding the capacity of our global manufacturing footprint to meet growing demand.
- Accelerating the development of new products and services designed to improve speed to market for our customers.

Revised pricing will be available from August 5th, 2026. Please contact your local Colorcon representative or submit a request via [My Colorcon](#) to receive updated price lists.

We thank you for your business and look forward to our continued partnership.

Sincerely,
