

## QUOTATION OF SURFACE GRINDER SP2506

Reference No.:

SM60315Q

Date of Issue:

15-3-26

| Specification                                 |      |                                                   |     |
|-----------------------------------------------|------|---------------------------------------------------|-----|
| Model                                         |      | SP2506                                            |     |
| Max. workpiece to be Ground                   |      | 630× 310× 390mm                                   |     |
| ( L× W× H )                                   |      |                                                   |     |
| max. grinding length                          |      | 630mm                                             |     |
| max. grinding width                           |      | 320mm                                             |     |
| Distance From Table Surface To Spindle Center |      | 550mm                                             |     |
| Slide way                                     |      | V-type rail with steel-ball                       |     |
| V-type rail with Steel-ball                   |      | 200kg                                             |     |
| Table Size (L× W)                             |      | 600× 300mm                                        |     |
| T -Slot                                       |      | 14mm × 1mm*n                                      |     |
| Cross Feed On Handwheel                       |      | 0.02/Graduation/2.5/revolution                    |     |
| Vertical Feed On Handwheel                    |      | 0.01mm/Graduation/1.25/revolution                 |     |
| Wheel Size (dia. × width× bore )              |      | Φ300×30×Φ75mm                                     |     |
| Spindle Speeds                                | 50Hz | 1440rpm                                           |     |
| total power                                   |      | 3.79kw                                            |     |
| Spindle Motor                                 |      | 4kw                                               |     |
| working pressure                              |      | 4mpa                                              |     |
